

1 **Name of Study: Contraception Induced Menstrual Changes**

2 **Study component: Focus Group Discussion, Females**

3 **FGD ID#: CIMC 103**

4 **Date of FGD: 23 January 2025**

5 **Time FGD Began: 11:18**

6 **Time FGD Ended: 13:25**

7 **Name of Facilitator: [redacted]**

8 **Name of Note taker 1: [redacted]**

9 **Name of Note taker 2: [redacted]**

10 **Location of FGD: Wits MRU board room**

11 **Name of Transcriber: [redacted]**

12 **Name of Translator: [redacted]**

13 **Name (s) of Reviewer (s): [redacted]**

14 **Observers: [redacted]**

15

16 **CONTEXTUAL INFORMATION**

- 17 • *This was an FGD with women between the ages 18-49 years.*
- 18 • *The interview was conducted in a private interview room.*
- 19 • *Some of the participants were responsive and were willing to share their perceptions and*
- 20 *experiences. However, participants number 1 and 2 were reserved and exhausted and less*
- 21 *responsive. Participant number 7 was also less responsive because she did mention that she*
- 22 *doesn't relate to some of the questions asked because of her experiences with her menstrual*
- 23 *cycle. Therefore, there were 3 participants in total who were not responsive during the FGD*
- 24 *unless the facilitator called them out to get responses.*
- 25 • *Overall, all the participants seemed a bit tired due to the heat in the interview room. Cold*
- 26 *water was provided, but the windows were closed during the FGD to ensure that there is no*
- 27 *noise from outside that will cause distractions.*
- 28 • *There were 7 females.*

29
30 **VERBATIM TRANSCRIPT**

31 **F: Today's date is the 23rd of January 2025. Time is 11:18, focus group C103. I would like to**

32 **greet you again. I welcome you to today's discussion. I hope that we are all comfortable. Before**

33 **we start, I would like for us to be creative a bit, relax our minds. Because we mentioned earlier**

34 **that we will not use our names when continuing with our discussion, we will use numbers. So, for**

35 **us to get to know each other better, even though we don't know our names, I would like for us to**

36 **play a brief game now. It is as follows: what animal do you most relate to, and why did you select**

37 **this animal?**

38 **P3: A dog [participant speaking softly, not clear].**

39 **F: Number 3.**

40 **P3: Oh, my goodness sorry! [Participant apologizing for not saying her PID number]**

41

42 [Chuckles]
43
44 **F: Yes.**
45
46 P3: It is a dog because//
47
48 **F: //Sorry please raise your voice//**
49
50 P3: // Eish I can't speak loudly; it is a dog because I can look after home. If I am a dog, I bite people
51 who are there to do mischief. I will bite them, I will sit in front of the door and be a dog and say, "whooh!
52 whooh! whooh"! [Participant is making barking sounds]
53
54 [Chuckles by participants]
55
56 **F: Okay, thank you...**
57
58 P6: I see myself as a monkey that is clever, yeah.
59
60 **F: Okay, why did you choose a monkey?**
61
62 P6: Because it is clever, it is smart.
63
64 **F: Oh okay, thank you.**
65
66 P2: A lion, because all the animals in the forest fear it. It is the one in charge. All the animals fear it.
67
68 **F: Mhm [neutral].**
69
70 P2: Mhm [Yes].
71
72 **F: How does the lion relate to you?**
73
74 P2: How does it relate to me?
75
76 **F: Mhm [Yes].**
77
78 P2: I am also feared.
79
80 [Chuckles by participants]
81
82 P2: I also am in charge.
83
84 **F: People are also scared of you.**
85
86 P2: Yes!
87
88 **F: Oh okay, thank you.**
89
90 P4: For me, it is an elephant, because it doesn't forget. You can do something to it now, it will
91 remember.
92
93 **F: Mhm [Neutral].**
94
95 P4: Maybe 10 years or 5 years. I also don't forget.

96
97 **F: Okay, thank you.**
98
99 P5: For me, number 5, it is a cat.
100
101 **F: Mhm [Neutral].**
102
103 P5: A cat, it is not easy for a cat to like – even if it is facing whatever it will succeed at the end. A cat
104 doesn't die easily. It can hustle.
105
106 **F: Mmh [Neutral], okay.**
107
108 P1: It is a frog, it is stubborn [chuckles by participant].
109
110 [Chuckles by participants]
111
112 **F: Okay, thank you. Would you say you are also stubborn?**
113
114 P1: [Participant nodding yes]
115
116 [Chuckles by participants]
117
118 **F: [chuckles] Okay...**
119
120 P7: I would also choose a lion, because a lion is feared, and it gets easily annoyed and it is easily
121 angered. I am also born in January; I am easily annoyed and get easily angered but have a beautiful
122 heart.
123
124 **F: Oh okay, thank you so much. Would you like to know me? [Chuckles]**
125
126 Yes! [All participants responded at once]
127
128 [Chuckles by participants]
129
130 **F: Okay, I will be brief. I would say I am a tiger. We all know that a tiger has stripes, so, the**
131 **stripes of the tiger make it unique. So, I can say that I am unique. But what I like the most about**
132 **the tiger is that it hunts and doesn't usually go with the crowd [when going to hunt]. So, I am also**
133 **like that, I am a person who doesn't usually go with the crowd, and I love to – if there is something**
134 **that I want in my life, I go after it no matter what. I make sure that what I want, I go after it until**
135 **I get it. So, I am very glad to know all of you. It was interesting to get to know which animals you**
136 **see yourselves as. I think that made us to know each other better between us. So, as we are**
137 **continuing with our discussion, we will be talking about menstrual cycles, okay. Sometimes**
138 **women and girls use different words when talking about menstrual cycles. We can also say it is**
139 **the days of month when they are bleeding. Please tell me what are some of the words you use**
140 **when talking about menstrual cycles or the days of the month when you are bleeding?**
141
142 P6: I usually call them [menstrual periods] *amaPs* ["Ps" is a plural for the letter P]. I call them *amaPs*
143 ["Ps" is a plural for the letter P]
144
145 **F: Oh, *amaPs* ["Ps"]!**
146
147 P6: Yes.
148
149 **F: Okay, why do you call them *amaPs* ["Ps"]?**

150
151 P6: Because it stems from [the word] periods, the “P” at the beginning [of the word periods].
152
153 **F: Mhm [Neutral].**
154
155 P6: Yes.
156
157 [Participant raised her hand]
158
159 P2: I say, *ngisuke ngisesikhathini* [Meaning: It is a Zulu word directly translated as, “I am on time”].
160 Because it is time to go on [menstrual] periods.
161
162 **F: Oh, the word, “esikhathini”, what does it mean from your knowledge?**
163
164 P2: Time, it is when it is time for the [menstrual] period to maybe change, I am now going on
165 [menstrual] periods.
166
167 **F: Oh okay.**
168
169 [Participant raised her hand]
170
171 P5: I usually say, *ngiya-bleeder* [Meaning: It is a Zulu slang word directly translated as, I am
172 bleeding]. Because it is when I am bleeding, I just say, *ngiya-bleeder* [Meaning: It is a Zulu slang
173 word directly translated as, “I am bleeding”], yes.
174
175 **F: Okay, thank you so much, number 5.**
176
177 [Participant raised her hand]
178
179 P4: I say, *ngikuma-period* [Meaning: It is a Zulu slang word directly translated as, “I am on periods”],
180 because I know that it when you are on [menstrual] periods.
181
182 **F: Mhm, okay, ukuma-periods** [Meaning: It is a Zulu slang word directly translated as, “you are
183 on periods”].
184
185 P3: I say, *ngiyopha* [Meaning: It is a Zulu word directly translated as, “I am bleeding”], because it is
186 when I am bleeding.
187
188 **F: Mhm [Neutral].**
189
190 P3: Maybe if the partner wants [sex], I say, *ngiyopha* [Meaning: It is a Zulu word directly translated
191 as, “I am bleeding”].
192
193 **F: Mhm [Neutral], so, it is like number 5 when she said she is bleeding. [Participant nods yes]**
194 **Okay, thank you.**
195
196 P1: I usually say, *ngikwi-season* [Meaning: It is a Zulu slang word directly translated as, “I am in a
197 season”] I am in a season.
198
199 **F: Mhm [Neutral].**
200
201 P1: That’s the word that I see is appropriate, no one will easily get it.
202
203 **F: Oh okay, why do you say season. what does season mean to you?**

P1: No, *Suzan*.

F: Oh, *Suzan*!

[Chuckles by participants]

F: Why do you call it *Suzan*?

P1: At home I grew up and they say that and there are boys at home.

F: The word *Suzan*, maybe how would you explain it? Why did you come up with it at home? You mentioned that there are boys, maybe it goes with a woman or?

P1: Yes, it goes with a woman [Meaning: the word *Suzan* is a name for females], and it is mindful of boys.

F: Oh okay, is there anyone else? [Slight silence] Okay, thank you so much. So, the words that you gave me, I noticed that it is words that are used during the days you are bleeding, right? But please can you tell me of other words that you have heard of or that you use when talking about a menstrual cycle. This includes where you are not yet on your menstrual periods, or you are on your menstrual periods or after you were on menstrual periods. It includes the whole menstrual cycle. Is there another word that you use?

P6: I have heard them saying, "*umuntu useJapan*" [Meaning: It is a Zulu slang word directly translated as, "a person is in Japan"].

F: Oh okay, what does it mean?

P6: It is that red dot [on the flag of Japan].

F: Mhm [Neutral].

P6: Yeah, so, it means that.

F: Oh, what does the red dot mean? What does it stand for?

P6: Since the [menstrual] blood is red, the dot is also red. It goes together.

F: Oh okay...Is there anything else?

[Participant raised her hand]

P3: I have heard them say, "*uya-menstruator*" [Meaning: It is a Zulu slang word directly translated as, "you are menstruating"].

F: Mhm [Neutral].

P3: "*Uya-menstruator*" [Meaning: It is a Zulu slang word directly translated as, "you are menstruating"]
[Chuckles by participants]

F: Oh okay...Alright...

[Participant raised her hand]

CIMC 101 English 23 Jan 2025

Final Version 1.0

Page 5 of 51

258
259 P5: If we are chatting at home, not at home, with friends, maybe someone is about to go on their
260 menstrual periods//

261
262 **F: // Mhm [Neutral]//**
263

264 P5: //We say the day is coming, **“usezogxaza”** [Meaning: It is a Zulu slang word directly translated as,
265 “I am about to bleed heavily”].

266
267 **F: Oh, you call it **“ukugxaza”** [Meaning: It is a Zulu slang word directly translated as, “To bleed
268 heavily”]?**

269
270 P5: Because most of the time I go [on menstrual periods] a lot. Now I just say, **“sengizogxaza”**
271 [Meaning: It is a Zulu slang word directly translated as, “I am about to bleed heavily”].

272
273 **F: You are about to?**
274

275 P5: I am about to start, **“sengizogxaza”** [Meaning: It is a Zulu slang word directly translated as, “I am
276 about to bleed heavily”]. Like something that is coming out a lot, it is flowing. I just say, **“sengizogxaza”**
277 [Meaning: It is a Zulu slang word directly translated as, “I am about to bleed heavily”].

278
279 **F: Oh okay...So, the word **“ukugxaza”** means to bleed [menstrual blood] heavily?**

280
281 P5: Yes. **“Gxaza”**, it is like when the water is coming out of the tap fast. I don’t know how to explain
282 it.

283
284 **F: Oh, like when water is coming out of the tap a lot.**
285

286 P5: Mhm [yes].
287

288 **F: So, **ukugxaza**, it is like when water is coming out of the tap a lot and compared to menstruating
289 heavily?**

290
291 P5: Yes.
292

293 **F: Oh okay, I understand. Thank you, thank you so much for the responses that you gave me.
294 Please may I remind you that if there is still someone else talking, we raise our hands, so, that we
295 don’t end up clashing and try to raise our voices. So, the words that we mentioned now, we are
296 allowed to use them during our discussion because they are words that you are used to using when
297 you are talking about what we will be talking about today. So, please be comfortable to use them.
298 We will then continue with our discussion. Women or girls, how do they keep track of their
299 menstrual cycles? How do they keep track of when their menstrual periods might start?**

300
301 [Participant raised her hand]
302

303 P2: I have **“islumo”** [Meaning: It is a Zulu word directly translated as, “menstrual cramps”] for 3 days,
304 then on the 4th day I start [menstrual periods].

305
306 **F: Oh okay...**
307

308 P2: Mhm [yes], I start by having **“islumo”** [Meaning: It is a Zulu word directly translated as, “menstrual
309 cramps”] for 3 days, then on the 4th [day] I will go on [menstrual periods].

310
311 **F: Oh okay, what is **“islumo”**?**

312
313 P2: "*Islumo*" is to have pain on your bladder [participant is referring to menstrual cramps].
314
315 [Participant raised her hand]
316
317 **F: Oh okay. Thank you, number 2. Number 4.**
318
319 P4: I have pimples on my face.
320
321 **F: Mhm [Neutral].**
322
323 P4: I have pimples on my face, or my breasts get sore when I am about to go on my menstrual periods.
324
325 **F: Oh okay...**
326
327 P4: That's the time I can see that I am about to go [on menstrual periods].
328
329 **F: Okay, thank you so much, number 4.**
330
331 P7: I would say, "*islumo*" [Meaning: It is a Zulu word directly translated as, "menstrual cramps"] is the
332 one that starts. But if you are a person that is on the right time [Meaning: "right time" the participant
333 means if an individual goes on their menstrual periods on their expected days], we usually go on
334 [menstrual periods] on the same date.
335
336 **F: Mhm [Neutral].**
337
338 P7: Maybe if you go [on menstrual periods] every time on the 16th, you know that every time on the
339 16th you go on your [menstrual] periods.
340
341 **F: Mhm [Neutral], okay... Is that how it is with you also?**
342
343 P7: It was like that.
344
345 **F: Oh okay. So, you start off by having menstrual cramps?**
346
347 P7: Yes.
348
349 **F: That is before .you go on your [menstrual] periods?**
350
351 P7: No, another individual might have menstrual cramps, another person knows when their date for
352 their [menstrual] periods is.
353
354 [Participant raised her hand]
355
356 **F: Okay, thank you so much, number 7. Number 5.**
357
358 P5: I can tell by having pimples on my face. 2, I urinate frequently, every hour I urinate. I urinate
359 frequently//
360
361 **F: //Mhm//**
362
363 P5: //So, that is when I can tell that I am about to...
364
365 **F: You are about to start your [menstrual] periods.**

366
367 P5: Mhm [Yes].
368
369 [Participants have their hands raised]
370
371 **F: Okay. Number//**
372
373 P6: //I, number 6//
374
375 **F: //I will come back to you, number 3, I have noted you. Yes, number 6.**
376
377 P6: My breasts become sore. Maybe for 2 days, 3 days. I have menstrual cramps, uhm I get hungry, I
378 eat a lot. They [menstrual periods] are not the same. Sometimes I don't eat at all. I vomit when I am
379 eating, I become nausea, I vomit, I vomit. Sometimes I eat, I eat and have an appetite. Yeah, it is that.
380
381 **F: Okay, thank you, number 6. Number 3.**
382
383 P3: I have pains here [participant pointing to her stomach] on my stomach. I get hungry a lot and feel
384 like eating. But then become nausea and feel like I could vomit the things that I have ate.
385
386 **F: Mhm [Neutral]. That happens before you start going on your [menstrual] periods.**
387
388 P3: Yes, before I start.
389
390 P1: I have a runny tummy. I have stomach cramps, and my breasts become sore.
391
392 **F: And that happens before you start [menstrual cramps].**
393
394 P1: Just before I start, yes.
395
396 **F: Okay, thank you so much for sharing your experiences. Maybe, have any of you heard of**
397 **women or girls in the community who use other ways to track [menstrual] periods? Maybe it can**
398 **be a calendar, maybe a reminder that they set on the phone or maybe there is an app that they**
399 **use, you see things like that. Have any of you heard of such things?**
400
401 [Participant raised her hand]
402
403 **F: Yes, number 4.**
404
405 P4: I have heard that there are those who set time on their phones to track their [menstrual] periods.
406 Another individual knows – maybe last month she went on [menstrual periods] on the 29th, she knows
407 that every time when it is the 29th, 30th, it is her days to go on her [menstrual] periods.
408
409 **F: Mhm [Neutral], okay. So, she sets an alarm on her phone?**
410
411 P4: There is an app//
412
413 **F: //Oh okay//**
414
415 P4: //There is an app that some use.
416
417 **F: Okay... Is there anyone else that has something else that is different?**
418

419 P2: It is a calendar. Like she mentioned, maybe if this month she went on [menstrual periods] on the
420 25th, maybe the following month if she was able to count, she will be able to go [on menstrual periods]
421 early or late. It depends on the date that she went on [menstrual periods].
422

423 **F: Okay, thank you so much for sharing. Okay, so that we all have the same understanding for**
424 **the rest of our discussion, when we are talking about a menstrual cycle, we are talking about the**
425 **monthly cycles women usually have. This includes the days of the month when you are bleeding,**
426 **the time just before you bleed, the time just after bleeding, and other times of the month in**
427 **between. Do we all understand what I have just said?**
428

429 Yes! [Participants all agreed at once]
430

431 **F: Are all of you still good?**
432

433 Yes! [Participants all agreed at once. Participant are listening attentively and lively]
434

435 **F: Okay, now I would like for you to think of how your own menstrual cycles have changed while**
436 **you are using contraceptives, it can be changes that you liked or changes that you didn't like.**
437 **There are questions that I am going to ask that goes with changes, it can be changes that you liked**
438 **and changes that you have not liked. Before I ask you these questions, please may I make you**
439 **aware that the questions will sound like they are similar. Please don't mind if it seems like I am**
440 **asking the same questions. There are some of you that will respond and respond to upcoming**
441 **questions yet some of you will not. That is why I ask the questions, for everyone to have an**
442 **opportunity to respond to the questions that I ask. Do we all understand?**
443

444 Yes! [Participants all agreed at once]
445

446 **F: Okay, thank you so much. First, please tell me about any ways contraception has changed how**
447 **often you have bleeding. So, please tell me about any ways contraception has changed how**
448 **frequently you bleed.**
449

450 P1: I can say that I go [on menstrual periods] for more days than before what used to happen before I
451 started to go on contraception.
452

453 **F: Okay, thank you so much, number 1. Let's look at before you started to be on contraception,**
454 **which changes did you notice as compared to when you started to be on contraception. How was**
455 **it before [using contraception]?**
456

457 P1: I would go [on menstrual periods] for 5 days. I wasn't heavy a lot. It would be heavy for that 3 days
458 and then the 2 days left would be light. Now, when I am on contraception I go [on menstrual periods]
459 for 7 days and they are heavy.
460

461 **F: Okay, thank you so much, number 1.**
462

463 P6: At first, I would go for 3 days, and it would be normal. Like day 2, it was heavy but not heavy, it
464 would just be heavy [Meaning: "it would just be heavy" means that the periods were moderate]. I would
465 then see that okay; I am on periods. Day 3, it would discontinue. Now, I go on [menstrual periods] a
466 lot, more than 7 days, 8 days or 9 days.
467

468 **F: Mhm [Neutral].**
469

470 P6: Yes, it becomes a heavy flow.
471

472 **F: Mhm [Neutral].**

[Participants raised their hands]

P6: Yeah, I even have a runny tummy. Yeah, it is that.

F: Okay, number 3. I have noted you, number 4.

P3: I would go on [menstrual periods] for 5 days at first. Now I go [on menstrual periods] for 3 days. It becomes very heavy during the 3 days and then during the 2 days, a small amount [of menstrual blood] comes out. And it becomes itchy underneath [participant referring to the vagina] when I am going on my menstrual periods.

F: Okay, yes number.

P4: Before I inserted the implant, I would go on [menstrual] periods and was able to tell when I will go [on menstrual periods]. Maybe if I go [on menstrual periods] on the 15th I know I would go [on menstrual periods] before or after the 15th, but close to it. I was able to tell. When I had inserted it [implant], 6 months finished without going on [menstrual] periods. I got worried and went to the clinic and got there and said, “I have inserted an implant and no longer going on [menstrual] periods” and the nurse said, “you should be happy because it [implant] means that it is working”. I went back home and stayed and went on my [menstrual] periods, after a while. Maybe it was 7 months I had inserted it [implant]. Lately now it [implant] has changed, I go [on menstrual periods] twice in 1 month. The first time, maybe I won’t go [on menstrual periods] for complete days//

F: //Mhm// [Neutral]

P4: //It would be like I am going [on menstrual periods], and even prepare myself that I am on periods. It will be 1 day maybe. Then again in the same month I will go [on menstrual periods] for 6 days. First 3 days it is heavy [Meaning: participant is referring to menstrual blood flow], and then it becomes lighter and lighter. But it might happen that I go [on menstrual periods] 2 days, the days have changed, they are more now.

F: Oh, so, when comparing, previously, they [menstrual periods days] were short but now they are more.

P4: Okay.

[Participant raised her hand]

F: Yes, number 7.

P7: I am a heavy bleeder. I used to bleed a lot before. I would bleed a lot. I used a 2 months injection, then it stopped completely. I didn’t go on [menstrual] periods at all. So, now, it started recently, I think it was late last year, that it changed. I now go on [menstrual] periods and I bleed heavily. The pills that we get the clinics don’t even work.

[Participant raised her hand]

F: Okay, number 5.

P5: Before, I would go [on menstrual periods] for 7 days. And I didn’t start off by having menstrual cramps, I would just see [menstrual] blood and then the menstrual cramps start. Now, I have menstrual cramps maybe 2 days before I go on [menstrual] periods. And I go [on menstrual periods] for 5 days, I don’t go for 7 days. And what has changed is that I now go [on menstrual periods], I skip 2 months and

527 go on the 3rd month [on menstrual periods]. I don't go for like every month and I don't have a date [for
528 upcoming menstrual periods], no.

529

530 **F: Mhm [Neutral].**

531

532 P5: This month it will be the 15th, the following [month] it will be the 25th.

533

534 **F: Oh okay...So, you can say that you don't go [on menstrual periods] as often as before?**

535

536 P5: Yes.

537

538 **F: Okay, so, sometimes people's [referring to women and girls] bleeding stops for a time while**
539 **they are using contraception. Uhm, is there anyone who had a similar experience?**

540

541 [Participants raising their hands]

542

543 P2: Yes.

544

545 **F: We will start with number 2. I have noted you, number 7. Yes, number 2.**

546

547 P2: I used the 3 months injection for contraception when I came back from giving birth. I didn't go on
548 my periods, it stopped for 10 years. Now, 4 months back I have started [menstrual periods], it [menstrual
549 periods] is for 5 days, and it is heavy. But I discontinued [menstrual periods] for 10 years.

550

551 **F: Okay, number 7.**

552

553 P2: As I have mentioned, I started for 2 months [menstrual periods] and then it [menstrual periods]
554 stopped. It [menstrual periods] stopped, but it is back now. It comes back anytime, and it is something
555 that you can't track when it is coming [participant referring to menstrual periods].

556

557 **F: Mhm...and then previously you were bleeding a little or you were bleeding a lot//**

558

559 P2: //I was bleeding a lot; I was a heavy bleeder from high school.

560

561 **F: Even now since it [menstrual periods] is back?**

562

563 P2: Yes.

564

565 **F: oh okay. Okay, thank you so much. Please tell me how contraception has changed how**
566 **regularly you have bleeding. So, I know that there are some of us that had touched on that**
567 **amongst us. Please don't mind as I had mentioned, there are questions that will sound like I am**
568 **repeating them because you have touched on them. But I would like to know how regularly you**
569 **have bleeding. Does it come when you expect it, or you bleed when you do not expect it?**

570

571 P6: Before I used the implant, I was able to track myself, like 3 months would end and I would know
572 that maybe on the 1st I go on [menstrual periods]. 3 months would end, maybe when we get to another
573 3 months it would change. I would go on [menstrual periods] maybe on the 30th or 25th. But now, I can't
574 track that. I just feel my body changing, the breasts, menstrual cramps and then I know that okay, I am
575 about to go on menstrual periods. But I don't have a date, I can't track them well.

576

577 **F: Oh okay. So, in this question that says your bleeding [menstruation] comes when you don't**
578 **expect it or it is bleeding [menstruation] that is regular, what would you say? How would you**
579 **respond to it?**

580

581 P6: It comes when I don't expect it.

582

583 **F: Oh okay. So, which makes it harder for you to know when you will start to bleed and when**
584 **will you finish?**

585

586 P6: Yes, yes.

587

588 [Participant raised her hand]

589

590 **F: Okay, thank you do much, number 6. Number 5.**

591

592 P6: So, before it [menstrual periods] would just come. But now I can [track menstrual periods] because
593 even though I don't have a specific date that it is on this date, but I can feel 2 days before that it
594 [menstrual period] is coming. I urinate, I become easily annoyed, things like that.

595

596 **F: Oh okay...**

597

598 P5: And, as I had mentioned, before I went 7 days, now 5 [days] but it is still the same.

599

600 **F: It is still the same.**

601

602 P5: Yes, it is still the same.

603

604 **F: Would you say it is more regular, your bleeding or it comes when you least expect it?**

605

606 [Slight silence, participant thinking]

607

608 **F: Is it regular or it comes when you don't expect it.**

609

610 P5: It came when I didn't expect it before, now I am able to [track menstrual periods]. Because I can
611 tell what will happen to me.

612

613 **F: So, it is easier for you to tell that you are about to go on your menstrual periods.**

614

615 P5: Yeah, it is easier now.

616

617 [Participant raised her hand]

618

619 **F: Okay, number 4.**

620

621 P4: Before, I was able to track when I will go on [menstrual] periods. Now, I don't know. It just comes
622 when I don't expect it. Even though I can feel my body [Meaning: participant is referring to body
623 changes before menstrual periods start] but I can't track when I will go [on menstrual periods]. I would
624 go every month before. Now, sometimes I go [on menstrual periods] for a month. Maybe I go twice in
625 a month. Maybe I would skip it [a month] and go on [menstrual periods] the following month. Maybe
626 I would go [on menstrual periods] consecutively. I am not sure how to track [menstrual periods].

627

628 **F: Okay, is there anyone else that would like to share? Thank you, number 4.**

629

630 [Slight silence by participants]

631

632 **F: Okay, we shared that some of us know that we can tell when we will start to menstruate right?**
633 **Can you tell when your menstruation will end, to those that said that they can see when they will**

634 **start [menstrual periods] during certain days. Are you then able to see when it will finish? Are**
635 **they [menstrual periods] regular in that way?**

636

637 [Participant raised her hand]

638

639 **F: Yes, number 5.**

640

641 P5: I can't tell, it is like they are getting less on the 3rd day, then on the 4th day they get back to normal.
642 Like sometimes I will insert the [sanitary] pad until I take it out and nothing [no menstrual blood] comes
643 out.

644

645 **F: Mhm [Neutral].**

646

647 P7: Before I started using contraceptives, I knew that I would go [on menstrual periods] for 7 days or 5
648 days, maybe on the 7th day is the last one. I was able to see when I will start and finish. But now, ever
649 since I started using different things [contraceptives], I can't see.

650

651 **F: Okay, number 7, are you able to tell when you are about to start?**

652

653 P7: No, I see it [menstrual periods] when it happens.

654

655 **F: Is there anyone else who can tell when they are about to start [menstrual periods] and know**
656 **that since they are about to start, on this day, they will finish on this day?**

657

658 [Participant raised her hand]

659

660 **F: Yes, number 4.**

661

662 P4: I can count my days because I know that if go [on menstrual periods] for 5 days. I know that if I
663 went [on menstrual periods] today, on a certain day I will be finished.

664

665 **F: Oh okay...**

666

667 P4: It is unusual for it [menstrual periods days] to exceed.

668

669 **F: Okay, thank you so much. Please tell me which ways contraception has changed how long you**
670 **have bleeding?**

671

672 [Participant number 6 mumbling, inaudible]

673

674 **F: Yes, number 6.**

675

676 P6: Please can you repeat the question.

677

678 **F: Oh okay. Please tell me about any ways contraception has changed how long you have bleeding.**

679

680 [Slight silence by participants]

681

682 **F: Here we are looking at that maybe when you are bleeding, how many days does it last? Is it**
683 **longer or shorter days as compared to before using contraception that you use?**

684

685 P6: Before, I inserted the implant, I knew that I go [on menstrual periods] for 3 days. Now that I have
686 inserted the implant, they [days on menstrual periods] are longer, they are many. Maybe they are
687 9...they are 8, 9, 10.

688
689 **F: Mhm [Neutral].**
690
691 P6: Yes.
692
693 **F: Okay, is there anyone else that would like to share.**
694
695 P1: I can say that my days are longer than before.
696
697 **F: Mhm [Neutral], okay. How many were they before?**
698
699 P1: They were 5 days [participant speaking softly].
700
701 **F: They were?**
702
703 P1: 5 days.
704
705 **F: Now...**
706
707 P1: 7.
708
709 **F: 7 days, oh okay. Is there anyone else that would like to share.**
710
711 P3: I first used 2 months [injection]; 2 months [injection] made me bleed a lot. Now I use the depo.
712 Depo, maybe it is 5 days, it doesn't have me bleeding a lot.
713
714 **F: It doesn't have you bleeding a lot?**
715
716 P3: No.
717
718 **F: Okay, so, the depo, before you used it, how many days was it [referring to the menstrual**
719 **periods]?**
720
721 P3: When was I using it at the beginning?
722
723 **F: Mhm [Yes].**
724
725 P3: Maybe it was for 2 [days], now it is 5 [days].
726
727 **F: It is 5 days...**
728
729 P3: Yes.
730
731 **F: Okay, is there anyone else?**
732
733 [Participant raised her hand]
734
735 **F: Number 4.**
736
737 P4: I won't say that the days have changed. I would go [on menstrual periods] for 5 days before
738 preventing [referring to contraception] and now I still go [on menstrual periods] for 5 days. The change
739 was that I now go [on menstrual periods] after months//
740
741 **F: //Mhm [Neutral]//**

742
743 P4: //Or go [on menstrual periods] twice in one month. To go [on menstrual periods] twice in a month
744 is something recent. Maybe it was November last year or October.

745
746 **F: Mhm [Neutral].**
747

748 P4: As I had mentioned, when I started to insert it, I stayed for 6 months without going [on menstrual
749 periods], I then went [on menstrual periods]. I would go [on menstrual periods] maybe after 3 months,
750 after 2 months and so forth. That is how it changed.

751
752 **F: Mhm [Neutral].**
753

754 P4: But the days are still the same, that it [menstrual periods] is 5 days.

755
756 **F: Okay, so, your days have not changed as compared to before you inserted it [referring to the
757 contraception].**

758
759 P4: Yes.

760
761 [Participant raised her hand]

762
763 **F: Oh okay. Number 5.**
764

765 P5: The days have changed, before I would go [on menstrual periods] for 7 days. But now it is 5 [days].
766 But the problem is that for 2 days I first have menstrual cramps. It is like the 2 days has shifted to being
767 menstrual cramps rather than [menstrual] periods.

768
769 **F: Mhm [Neutral].**
770

771 P5: Yes.

772
773 **F: Okay, okay. Thank you so much. Please may we go back briefly to the question that I had
774 asked, 4.2. Some of you mentioned that you can't predict if your [menstrual] periods are about to
775 start. Do you remember?**

776
777 Yes! [All participants agreed at once]

778
779 **F: Okay, so, to those who said they can't predict their [menstrual] periods, is there something
780 that they use to track when their [menstrual] periods will start?**

781
782 [Slight silence by participants]

783
784 **F: There is nothing that you use? [Participant nodding her head to say no] Number 3, I see that
785 you are nodding your head.**

786
787 P3: No, there isn't. [Chuckles by participant]

788
789 **F: There isn't, okay, there is no problem. I just wanted to know. Is there anyone else?**

790
791 [Participant nodding her head to say no]

792
793 **F: Number 6, I see you also nodding your head.**

794
795 P6: No...

796
797 **F: There isn't...**
798
799 P6: No, there isn't.
800
801 **F: Oh, alright...//**
802
803 P6: //There is no one that likes [menstrual] periods.
804
805 [Chuckles by participants]
806
807 P6: If we don't have them, we get happy.
808
809 [Chuckles by participants]
810
811 **F: [Chuckles] Oh, you don't get worried?**
812
813 Yes! [All participants agreed at once]
814
815 [Chuckles by participants]
816
817 **F: Okay, alright...When you have bleeding, how does contraception change how much you bleed**
818 **during those days? [Slight silence by participants] So, how does contraception change how much**
819 **you bleed during those days? [Slight silence by participants] Do you have more bleeding or less**
820 **bleeding?**
821
822 P6: Before I inserted the implant, I was bleeding moderately. It was normal, I was used to it. Now that
823 I have inserted the implant, I bleed heavily.
824
825 **F: Okay...**
826
827 P6: I am sorry to say this but at the beginning, first 6 months I would come out blood clots like a liver.
828
829 **F: Mhm [Neutral]**
830
831 P6: But it [blood clot] was not big but they were the size of a hand or half of a hand. I would feel them
832 [blood clots] saying bruh! bruh! bruh! [the sound of the blood clots coming out] . I would even want to
833 see what is happening and take the brush to the toilet and saw that it [blood clot] is [like] a liver. It was
834 like that. Uhm, they [menstrual periods] are heavy, they are very heavy.
835
836
837 **F: Mhm [Neutral].**
838
839 P6: Yeah, it is that only.
840
841 **F: Okay, is there anyone else that would like to share?**
842
843 [Participant raised her hand]
844
845 **F: Number 5.**
846
847 P5: I would say that before I would go [on menstrual periods] a lot. Now, it is not the same. It is not
848 like it has decreased a lot, but it is better than before because even at night I would change [sanitary
849 pad] maybe 3 times. If I don't change [the sanitary pads], I will wake up the bed messed up [Meaning:

850 Participant is referring to the bed getting dirty because of menstrual blood]. If I don't want to change
851 [the sanitary pads] I had to put the nappies for older people. Now, maybe I change [the sanitary pad]
852 once, not like before and I use a [sanitary] pad. Before, if I was going to town, I would make sure that
853 I carry a lot of them. Wherever I was I had to change [the sanitary pad], I can't insert the nappies for
854 older people.

855
856 **F: Okay, number 5 would you say that before they were heavy and then now, they are moderate?**

857
858 P5: Yes.

859
860 P1: I would say previously they [menstrual periods] were normal and now they are heavy.

861
862 **F: Mhm [Neutral] okay... Is there anyone else that would like to share?**

863
864 [Slight silence by participants]

865
866 **F: Okay, thank you so much. What would you say about how your bleeding looks? Since you are**
867 **using contraceptives, how has it changed how your bleeding looks? Number 5, sorry number 6**
868 **mentioned that her blood ended up having clots. So, maybe let's start with, number 6 since your**
869 **blood has clots, how was it? Has its color changed? How was the color, yeah.**

870
871 P6: How my blood looked was much darker than before.

872
873 **F: Okay, before how was the color?**

874
875 P6: It was red. Now it is dark red. It has changed.

876
877 [Participant raised her hand]

878
879 **F: Okay, yes number 2.**

880
881 P2: I also agree with her. Before, it was light, it was red. Now it is dark!

882
883 **F: Mhm [Neutral] is it dark red?**

884
885 P2: Yes...

886
887 **F: Oh okay. Do you also have blood clots, or you don't have them?**

888
889 P2: No, I don't have them.

890
891 **F: Okay...**

892
893 [Participant raised her hand]

894
895 **F: Yes, number 5.**

896
897 P5: I can also say it [blood color] is strong now and I have clots. I initially had them [blood clots] but
898 they are small now, they are unlike before.

899
900 **F: Oh okay...**

901
902 P5: And now it's like, if I am sitting like this, I won't have anything [referring to menstrual blood], the
903 problem is when I go to urinate. Then when I come back, I don't have anything again.

957

F: You don't have anything, you don't //

P5: //It's like I am bleeding, but I am bleeding, but I bleed a lot. Once I go to urinate, it's like I urinate it [menstrual blood], then when I come back [from the rest room] it will be those drops, drops.

F: Oh okay...//

P5: //Yes.

F: When you are on your menstrual periods, how long does it happen for, that once you go to the toilet [rest room] how much you bleed decreases?

P5: It was not happening before I used the implant, now that I am using the implant it is happening. It's like I will insert it [sanitary pad] in the morning at 6.

F: Mhm [Neutral].

P5: I will stay and not feel like urinating and not have anything [no menstrual blood]. Then when I got to urinate maybe at 8 [in the morning], I will urinate it [menstrual blood]. After that I will start to have drops [of menstrual blood].

F: Oh...does it happen for 1 day or days?

P5: Like it is for 2, 3 days then after that the 2 days left for 5 days, I will then be normal.

F: And it [menstrual blood] will be coming out normal...

P5: Yes...

F: Okay. You mentioned that your blood is strong, when you say it is strong what is that color?

P5: It is dark.

F: Dark red?

P5: Yes, dark red.

[Participant raised her hand]

F: Oh okay, thank you, number 5. Number 4.

P4: First 3 days when I am on [menstrual] periods, they are dark [referring to the color of the menstrual blood during first 3 days of menstrual periods] and there are also clots. When I continue because becomes less on the last 2 days, the blood becomes lighter, it doesn't become dark like when I am starting.

F: Oh okay, and when you say dark, you mean it becomes dark red//

P4: //Dark red.

F: Oh okay...

P4: Then when I am about to finish [menstrual periods], it becomes red that looks like it is normal...

958
959 **F: That looks like it is normal...Okay, thank you, number 4. Is there anyone else?**
960
961 [Slight silence by participants]
962
963 **F: Okay, so, when we are on our [menstrual] periods, have you noticed that there is this discharge**
964 **that comes out that is not blood, it looks like it is clear [in color], there are many ways to describe**
965 **it. Have any of you seen that discharge come out?**
966
967 P3: Please may I.
968
969 **F: Yes number 3. I have noted you, number 4 and number 5.**
970
971 P3: Yes, I have seen it [discharge] when I am maybe going to urinate, something comes out that says
972 **bhaca** [Meaning: It is a Zulu sound of a fluid like thing that is falling, in this context it is the discharge
973 that that falls which the participant is referring to].
974
975 **F: What color is the discharge?**
976
977 P3: It is dark!
978
979 **F: It is dark.**
980
981 P3: It is dark red, yes.
982
983 **F: Oh okay...**
984
985 P3: Yes, it is like that. It is a clot; I don't know if it is a clot or what, but it comes out and says, "**bhaca**"
986 [Meaning: It is a Zulu sound of a fluid like thing that is falling, in this context it is the discharge that
987 that falls which the participant is referring to].
988
989 **F: Okay, maybe would you say it is a discharge or would you say it is a clot that we were talking**
990 **about?**
991
992 P3: Yes...
993
994 **F: It is a clot.**
995
996 P3: Yes...
997
998 **F: Yes, number 5.**
999
1000
1001 P5: I have seen it, to me it is not dark red. It has a color that looks like it is – how can I say this – I don't
1002 know how to explain it, but it becomes light. Like, if you are going to urinate it will stay and you must
1003 wipe it with the tissue.
1004
1005 **F: When you say it is light, do you mean it doesn't have a color or....**
1006
1007 P5: No, it does have it, it is red, but it is not red like the clots.
1008
1009 **F: Oh okay, maybe can you explain how it looks, maybe the texture.**
1010
1011 P5: It is sticky.

1012
1013 **F: What does it do?**
1014
1015 P5: It is like it is sticky. I don't know how to put it; it is a discharge.
1016
1017 P7: It is slicky [participant is whispering and speaking softly].
1018
1019 **F: Oh, number 7 says it is slicky.**
1020
1021 P7: It is slippery.
1022
1023 **F: It is slippery.**
1024
1025 P5: It is slippery, yeah.
1026
1027 **F: Oh okay. Do you also agree with her number 5?**
1028
1029 P5: Yes.
1030
1031 **F: Alright, thank you, number 5. Number 4.**
1032
1033 P4: For me it is a question, when you are talking about **uketshezi** [Meaning: It is a Zulu word that means
1034 a discharge] you mean as in like a discharge?
1035
1036 **F: Yes...**
1037
1038 P4: Okay...before contraception there was a brown discharge. It was light brown and slippery. It used
1039 to be there.
1040
1041 **F: The brown discharge, would you say it was slippery like the one that they [number 5 and 4]
1042 were explaining?**
1043
1044 P4: Yes.
1045
1046 **F: When did you have it//**
1047
1048 P4: //Before I started [menstrual] periods.
1049
1050 **F: Oh...**
1051
1052 P4: I would tell with it that I will be on [menstrual] periods and not go straight [on menstrual periods]
1053 and insert a [sanitary] pad and bleed.
1054
1055 [Participant raised her hand]
1056
1057 **F: Yes number 7.**
1058
1059 P7: Please may I agree with number 3. This thing you can feel it even when it is coming out on its own.
1060 You can be on [menstrual] periods but when you have it you can feel it that is coming out.
1061
1062 [Number 2 is distracted; she keeps looking at her phone]
1063
1064 **F: Oh okay. Thank you so much for the things that you have shared. Please may I ask that we put
1065 our cellphones in our pockets or in our bags to ensure that we don't get distracted.**

1066
1067 [Participants placing their phones in their handbags]
1068
1069 **F: Okay. Can you please tell me how contraception has changed your menstrual cramps?**
1070
1071 P6: I, number 6//
1072
1073 **F: //Mhm [Neutral], I have noted you, number 1. Yes, number 6.**
1074
1075 P6: Before I inserted the implant, I would have a feeling that is **heh!** [Meaning: It is a sound in Zulu
1076 that is made by an individual if an individual is afraid in this context].
1077
1078 **F: When you say, “Heh”! What does heh mean?**
1079
1080 [Chuckles by participants]
1081
1082 P6: It was painful a little bit, it was painful a little bit. Now since I am sitting down, I have that
1083 discomfort. It is not only when I am going on [menstrual] periods, but also something that happens daily
1084 even when I am not on [menstrual] periods. I have those menstrual cramps, like it is a norm for me.
1085
1086 **F: Okay...**
1087
1088 P6: Yeah, that is what has changed...
1089
1090 **F: Oh okay...Would you say that you would have menstrual cramps a little bit before you used**
1091 **contraception?**
1092
1093 P6: Yes, I had them [menstrual cramps] a little. Now, it is every day.
1094
1095 [Participant raised her hand]
1096
1097 **F: Okay, thank you, number 6, number 1.**
1098
1099 P1: I would say before I was on contraception I had menstrual cramps//
1100
1101 **F: Mhm [Neutral].**
1102
1103 P1: Now, no I don't have them [menstrual cramps] anymore.
1104
1105 **F: How does that make you feel that you don't have them [menstrual cramps] anymore?**
1106
1107 P1: It makes me feel good. [Chuckles by participant]
1108
1109 **F: [Chuckles] Okay, thank you, number 1. Number 5.**
1110
1111 P5: Before, I had them [menstrual cramps] until 3 days. Now I have them [menstrual cramps] before I
1112 start [menstrual periods], then once I have started [menstrual periods] I become okay [participant
1113 doesn't have menstrual cramps once she has started menstrual periods].
1114
1115 **F: Oh okay. Your [menstrual] cramps last you for 3 days?**
1116
1117 P5: Before, they used to be 3 days, now maybe it is for 1 day before I start [menstrual periods].
1118
1119 **F: Mhm [Neutral]...**

1120
1121 P5: Once I have started, I don't have...
1122
1123 **F: You don't have menstrual cramps.**
1124
1125 P5: Yes...
1126
1127 [Participant raised her hand]
1128
1129 **F: Oh okay, yes number 4.**
1130
1131 P4: I didn't have menstrual cramps before contraception. I didn't know what it is. Then when I had
1132 started to use contraception, then I felt it and had pains here in front and at my back. As number 6 has
1133 mentioned, it has also become a norm to me. It happens that even if I am not going to go on [menstrual]
1134 periods but feel the pains of menstrual cramps even though I am not on [menstrual] periods. And it is
1135 when I have finished my [menstrual] periods, not that it will alert me that I will go on [menstrual]
1136 periods, no.
1137
1138 **F: Okay, thank you so much. Number 4 and number 6, the menstrual cramps that you have even**
1139 **when you are not on your [menstrual] periods, would you say they are more painful as compared**
1140 **to before or they are not more painful?**
1141
1142 P6: I would say that if I am on [menstrual] periods or about to go on [menstrual] periods since I have
1143 inserted the implant//
1144
1145 **F: //Mhm//**
1146
1147 P6: //They [menstrual cramps] are painful, they are unbearable. They are painful. But once I am
1148 finished, I can feel that I have [menstrual] cramps but they're not the same as when I am on my
1149 [menstrual] periods. But there is also discomfort, it is not right.
1150
1151 **F: Oh okay. So, number 6, they are [menstrual cramps] are more painful when you are on your**
1152 **[menstrual] periods?**
1153
1154 P6: Yes.
1155
1156 **F: But when you are not on your [menstrual] periods, they continue but they are not painful that**
1157 **much?**
1158
1159 P6: Yes, yes.
1160
1161 [Participant raised her hand]
1162
1163 **F: Thank you, number 6, number 4.**
1164
1165 P4: They are [menstrual cramps] bearable if you are not on your [menstrual] periods. But if I am on my
1166 [menstrual] periods, it becomes painful, you feel like sleeping and try to ignore the pain. But they are
1167 bearable if you are not on [menstrual] periods.
1168
1169 **F: Okay, thank you so much. [Participants seemed a bit exhausted] Alright, how do you feel? Are**
1170 **you alright?**
1171
1172 We are alright! [All participants responded at once]
1173

1174 [Chuckles by participants, participants are lively]

1175

1176 **F: Okay, in terms of what we have spoken about now, is there anything that maybe you think you**
1177 **would like to add or that you would like to share?**

1178

1179 [Slight silence]

1180

1181 **F: So, while we have been having our discussion, [Name of note taker 2] our note taker was writing**
1182 **while we were having our discussion [Note taker 2 and observer are finishing up to stick the charts**
1183 **on the wall]. Now I would like for us to look at this side where there are charts that she has written**
1184 **about the things that we were talking about. We will look at them and review them to check if we**
1185 **have not left out anything in terms of the charts. Okay, we will start with a question, the 1st one**
1186 **that we discussed. How often you bleed. Some of you said more often than before. Some of you**
1187 **said less often than before. Is there anything else that we would like to add? [Slight silence by**
1188 **participants, suggesting there is nothing that they would like to add]. Okay, and then how**
1189 **regularly do you bleed? Some of you said the date is unpredictable. Some of you said twice a**
1190 **month. Some of you said regular monthly. Some of you said every after 2 months it's**
1191 **unpredictable. Another one said it comes anytime, it can't be tracked, no date. Is there anything**
1192 **else that you would like to add here? [Slight silence by participants, suggesting there is nothing**
1193 **that they would like to add] Okay, how long you bleed? One said 5 days, shorter than before.**
1194 **Another said 8, 9, 10 days longer than before. Another said 5 days, nothing has changed as**
1195 **compared to before, it is the same dates. It is 5 days. Another said it is 7 days longer than before.**
1196 **Another said 5 days longer than before. Is everything right?**

1197

1198 Yes! [All participants responded at once]

1199

1200 **F: Okay, how much you bleed. Some said less bleeding. Others said heavy bleeding. Is there**
1201 **anything that we would like to add here?**

1202

1203 No [All participants responded at once].

1204

1205 **F: Okay, how blood looks. Here some said it starts with dark red with clots, gets lighter towards**
1206 **the end of cycle. Others said darker red color. Less clots, lots of clots. Others said very light red**
1207 **color, slippery fluid. Is there anything that we would like to add there? [Participants slightly**
1208 **silent] Are we good?**

1209

1210 Yes! [All participants responded at once].

1211

1212 **F: Menstrual cramps, others said, experiences [menstrual cramps] everyday discomfort even**
1213 **when not on [menstrual] periods. Some said experiences cramps before her [menstrual] periods**
1214 **start. Other said experiences cramps, a lot of pain during her period. Is there anything that we**
1215 **would like to add here? When looking at it, there is nothing that we would like to add, we are all**
1216 **happy?**

1217

1218 Yes. [All participants responded at once].

1219

1220 P5: Yes, we are alright.

1221

1222 **F: Alright, thank you so much. We can continue with our discussion. Are there any other ways**
1223 **contraception has changed your menstrual cycle that we have not talked about yet and need to**
1224 **add to the wall? That concerns menstrual cycles. [Slight silence by participants] Are there any**
1225 **other ways contraception has changed your menstrual cycle that we can add on the wall?**

1226

1227 [Participant raised her hand]

1228 **F: Yes.**
1229
1230 P4: It is the changes in your body.
1231
1232 **F: Okay...**
1233
1234 P4: Should I continue to explain?
1235
1236 **F: Yes, you can continue and explain.**
1237
1238 P4: Sometimes when you prevent [referring to contraception] you become fat, you gain weight.
1239
1240 **F: Mhm [Neutral].**
1241
1242 P4: Yeah, it is that.
1243
1244 **F: Okay, thank you so much, number 4. I am glad that you added the body changes, we will move**
1245 **to the next question. The changes that we have discussed about menstrual cycles, how did they**
1246 **make your body feel? Please can number 2 share with us, number 2 is quiet... [Slight silence by**
1247 **participants] How have all these changes to your menstrual cycle made your body feel?**
1248
1249 P2: My body is always exhausted. There is exhaustion or maybe when I am about to go on [menstrual
1250 periods] I have a headache.
1251
1252 **F: Mhm [Neutral].**
1253
1254 P2: Yeah.
1255
1256 **F: Okay...**
1257
1258 P6: Before I inserted the implant, my goodness I was size 36, 38. When I inserted the implant, I was
1259 40, 42 [Chuckles by participant].
1260
1261 **F: Mhm [Neutral].**
1262
1263 P6: So, it made me gain weight. I don't like it, it made me gain weight and the energy to have sex, my
1264 feelings have decreased. I don't have them [feelings] anymore. First 6 months, when a person was
1265 holding me, it felt like he is holding me forcefully. I would say oh my goodness! I don't have the energy
1266 anymore.
1267
1268 **F: So, when you are talking about energy, are you talking about emotions, the energy to have sex**
1269 **or...**
1270
1271 P6: It is the feelings for sex, the energy for sex and to crave for sex. It is not there anymore.
1272
1273 **F: Okay...**
1274
1275 P2: I agree with number 6, I run out of feelings. You just have sex forcefully but if it were up to you,
1276 you would say I can't.
1277
1278 **F: Okay, number 2 and number 6, how does that make you feel.**
1279
1280 P2: It makes me feel bad because it is as if I am doing something forcefully, when I don't like to because
1281 I don't have feelings for it.

1282
1283 P6: I also don't like it. The way I feel, I don't like it. It is not nice sitting with your partner enjoying
1284 yourselves and then it is as if he is abusing you. You were laughing and it was nice but when he touches
1285 you, you feel like running away and screaming. That is how it is.

1286
1287 **F: Thank you for sharing. Is there anyone else that would like to share. Number 4, I heard you**
1288 **mention weight, that ever since you have used contraception you have gained weight. How does**
1289 **that make your body feel?**

1290
1291 P4: My body is fat. I have gained because of using implant. But it is not like I gain daily. I gain weight
1292 and be able to have a size and know which size I wear. Not that because it [implant] is for a period of 3
1293 years, I will gain throughout the period of 3 years. My body is not like before, it has gained.

1294
1295 **F: Mhm [Neutral] and how does that make you feel?**

1296
1297 P4: I don't have a problem with it.

1298
1299 **F: You don't have a problem with it. Oh okay. Would you say it is a positive impact that your**
1300 **contraception had?**

1301
1302 P4: Yes.

1303
1304 **F: Okay, is there anyone else that would like to share. Number 5.**

1305
1306 P5: Before I used implant, I tried the 3 months [injection] [participant is speaking softly]

1307
1308 **F: Please can you raise your voice.**

1309
1310 P5: Okay before I used the implant, I tried the 3 months [injection]//

1311
1312 **F: Injection.**

1313
1314 P5: Mhm [yes] injection.

1315
1316 **F: Okay...**

1317
1318 P5: My goodness! I would have fit in a box for match sticks [Meaning: participant means that she was
1319 very skinny that she could fit in a box for match sticks]. I am naturally small [in terms of weight], so I
1320 got skinny in such a way – so, now since I am using an implant I am back to my [normal] weight. It is
1321 right, you don't gain nor lose [weight], I am just me.

1322
1323 **F: And how does that make you feel?**

1324
1325 P5: I am alright. I don't want to be fat, and I don't want to be skinny. I am alright.

1326
1327 **F: Okay, so, would you take that as a positive impact?**

1328
1329 P5: Yes.

1330
1331 **F: Okay, alright thank you. Is there anyone else that would like to share? Number 7.**

1332
1333 P7: I agree with number 6. Most of the time I can't comment because most of the time I didn't go on
1334 my [menstrual] periods.

1335

1336 **F: Mhm [Neutral].**
1337
1338 P7: So, some of the things that they are experiencing, I didn't experience them because I was not on my
1339 [menstrual] periods for so long. But the injection that I am using is right for me and for my body. The
1340 only thing that I don't like is the sex drive.
1341
1342 **F: What does it do?**
1343
1344 P7: Yoh! You feel like screaming when someone [male partner] place their hand on you. [Chuckles
1345 by participant]
1346
1347 **F: Mhm [Neutral].**
1348
1349 P7: It is like they are abusing you. You feel like not seeing him. You see the matter of sex guys! That's
1350 the only reason I would say, but my injection is treating me well and not going on [menstrual] periods,
1351 I am alright and happy because I don't like them anyways.
1352
1353 **F: Okay, how does it make you feel that your sex drive is low? Is it a good thing for you or**
1354 **would you say it has a negative impact?**
1355
1356 P7: Both.
1357
1358 **F: Okay, how?**
1359
1360 P7: Uhm, because it does happen that at that time I don't want to [have sex], you see.
1361
1362 **F: Mhm [Neutral].**
1363
1364 P7: But I also must think for him, that you see...
1365
1366 [Chuckles by participants]
1367
1368 P7: There are things that I do even though I don't like them, but I am thinking about my partner who
1369 is next to me, you see.
1370
1371 **F: Mhm [Neutral].**
1372
1373 P7: So, by my side it is right. I am alright.
1374
1375 **F: So, the person that you are worried about is your partner?**
1376
1377 P7: Yeah...
1378
1379 **F: Thank you so much, number 7. Finally, all these menstrual changes, how have they impact**
1380 **your day-to-day life?**
1381
1382 P6: I am speaking with regards to the moods.
1383
1384 **F: Mhm [Neutral].**
1385
1386 P6: Moods change, they just change. You get angry and sometimes be alright. Then it is like you have
1387 depression, you feel like locking yourself up and sit alone and not talk to anyone. The phone mustn't
1388 ring. It is like you could sit and read something. It has changed in that way in my life.
1389

1390 **F: Okay, so, can you say that your moods made you less social?**
1391
1392 P6: Yes, yes, very much.
1393
1394 **F: Okay, did that not affect your relationship?**
1395
1396 P6: It affected my relationship and my family.
1397
1398 **F: Mhm [Neutral].**
1399
1400 P6: My family is active. Now when they say they are going somewhere, I am not going. It becomes,
1401 yeah it becomes like that.
1402
1403 **F: Okay, when you say you are active, you mean you like going out?//**
1404
1405 P6: Yes, yes, we like going out, we like talking. When it is time for dinner and time for watching tv, we
1406 talk, we talk. Now, it is like they could watch their soapiers [Meaning: Soapiers are serialized dramas,
1407 usually dealing with domestic themes and characterized by sentimentality, broadcast on television] and
1408 watch them the following day sitting alone.
1409
1410 **F: Okay. Thank you, number 6. Is there anyone else that would like to share?**
1411
1412 [Participant raised her hand]
1413
1414 **F: Yes, number 3.**
1415
1416 P3: I get annoyed easily and don't like talking. You see when I don't want to talk, I just shout at you.
1417 When you try to speak, I shout at you. I lose relationships.
1418
1419 **F: Mhm [Neutral]. How did that affect you, maybe at home, in your relationship, at work...**
1420
1421 P3: It saddens me, it is difficult.
1422
1423 **F: Mhm [Neutral].**
1424
1425 P3: It is difficult.
1426
1427 [Number 2 is nodding as a sign of agreeing with what number 3 is saying]
1428
1429 **F: Okay, number 2, I noticed that you agree with the number 3.**
1430
1431 P2: I am always easily annoyed, and I don't like sitting with people. It is like you can always sit alone.
1432 You are always angry.
1433
1434 **F: Mhm [Neutral]. How does that affect your relationship, in the family and so forth?**
1435
1436 P2: It affects me at home because I can't sit with my friends and people. I am always shouting; I shout
1437 at everyone even if they have done nothing.
1438
1439 **F: When that happens are you able to go back and//**
1440
1441 P2: I can go back and see that I was wrong because I shout even when there is no need.
1442

1443 **F: Mhm [Neutral]. Okay, is there anyone else that would like to share? Is there anyone who would**
1444 **say that these changes had an impact even with the chores that you do maybe at home or at home**
1445 **it affects you?**

1446
1447 [Participant raised her hand]

1448
1449 **F: Yes, number 5.**

1450
1451 P5: It happens when I am about to go [on menstrual periods]. But it is not like it is something that
1452 always happens. When I am about to go on my [menstrual] periods, I become irritable. I don't eat, like
1453 for 2 days I don't eat. I will only drink liquids, I don't crave food.

1454
1455 **F: Mhm [Neutral].**

1456
1457 P5: I will be irritable. If a person talks, even if they are not wrong but I will see it wrong.

1458
1459 **F: Mhm [Neutral].**

1460
1461 P5: Yes, it is something like that.

1462
1463 **F: Then how does that affect your relationships?**

1464
1465 P5: I would say with my friends and boyfriend – because like at home I live alone, I just sleep. So,
1466 when it is that time I don't go to any friends, I don't have time for a boyfriend.

1467
1468 **F: My goodness, what do you do when your boyfriend wants to see you?**

1469
1470 [Chuckles by participants]

1471
1472 P5: He also knows, he just says, "Oh, it is those days".

1473
1474 [Chuckles by participants]

1475
1476 **F: He now understands! [Chuckles]**

1477
1478 P5: He knows! [Chuckles by participant]

1479
1480 **F: [Chuckles] Oh okay...**

1481
1482 [Participant raised her hand]

1483
1484 **F: Yes, number 7.**

1485
1486 P7: Please may I add to number 5. And the body fatigue. Because when I come back from getting an
1487 injected, in the 3 days or 2 days after coming back, you feel like you can always be sleeping and do
1488 nothing. You see, there is nothing that you enjoy more than sitting alone because you know you are
1489 doing nothing. I don't know if I am going to say it is the things [contraceptives] that we are using that
1490 make our bodies very tired. You see if you woke up and ate//

1491
1492 P5: //You are done//

1493
1494 P7: // That's the only thing you can do the whole day.

1495
1496 P5: //Sometimes you are even lazy to//

1497
1498 P7: // And//
1499
1500 P5: //Sorry//
1501
1502 P7: // And we enjoy that we have peace if we are alone, because we don't talk to anyone. We don't sit
1503 with anyone. You are tired, you don't feel like doing anything.
1504
1505 **F: Do they understand at home though?**
1506
1507 P7: I am married, I live with my husband and children only.
1508
1509 **F: Mhm [Neutral].**
1510
1511 P7: So, I will sleep when I want to sleep.
1512
1513 [Chuckles by participants]
1514
1515 **F: What does your husband say?**
1516
1517 P7: It is when he is not around, he is at work.
1518
1519 **F: Oh okay...**
1520
1521 P7: But you can feel the body that, "you see today" – but it is not a frequent thing. You see when I have
1522 just come from getting an injection, I can feel that I could sleep and do nothing. Just sleep the whole
1523 day.
1524
1525 **F: Mhm [Neutral] Okay, number 5 you seemed like you wanted to say something.**
1526
1527 P5: Oh, I was agreeing with number 7. Sometimes you are lazy to make something to eat. You get
1528 tired and want nothing, but you are hungry but want nothing. You are tired, it makes you lazy.
1529
1530 [Participant raised her hand]
1531
1532 **F: Number 1.**
1533
1534 P1: I also wanted to say I agree with number 7 and 5. I am lazy to clean the house. You feel like
1535 sleeping and sit alone with your phone.
1536
1537 **F: Mhm [Neutral]. Okay, thank you so much for sharing your experiences. [Name of note taker**
1538 **2] has written what we were talking about. Please may we look at it, just like how we did before.**
1539 **So, we spoke about how changes make your body feel. We spoke about weight gain. Others**
1540 **mentioned that that had a positive impact and felt happy that they are gaining weight. Uhm,**
1541 **another individual said the [body] weight has been the same. It has never changed, so that is a**
1542 **positive impact, it makes her happy. She is okay with that. Another individual said, the weight**
1543 **gain has a negative impact, she doesn't like that she has gained. There is a few of you who said**
1544 **the low sex drive makes your feelings and energy change. So, that had a negative impact especially**
1545 **with their relationships. Others said they are tired all the time. Is there anything that we would**
1546 **like to add? Are we alright and happy with everything? [Participant silent] Do we agree with**
1547 **what is written?**
1548
1549 Yes! [All participants agreed at once]
1550

1551 **F: Okay, how changes impact your daily life. That is the next thing that we discussed. Others said,**
1552 **“loss of appetite”. Others said, “moody, less social, affected person life”. Others said, “moody,**
1553 **always angry, shouts at others”. Others said, “body feels tired, no energy to do anything or**
1554 **chores”. Is there anything left? Are we all happy with what we have written there?**

1555
1556 Yes! [All participants agreed at once]

1557
1558 **F: Are we all still good?**

1559
1560 Yes! [All participants agreed at once]

1561
1562 **F: Alright. Uhm, we will continue with our discussion, but it will be slightly different, the section**
1563 **that we are about to move on to. If there is anyone who would like to drink water, they can drink**
1564 **them. Yeah, lets just relax. So, please can we look this side. There is an activity that we are going**
1565 **to do now called body mapping. We will notice that there are 2 charts where we are looking at**
1566 **the wall. There is chart on my left, the chart is showing the back of the woman. It is the back of a**
1567 **woman. And then the chart of my right is showing the front of a woman. We all can see it.**

1568
1569 Yes! [All participants agreed at once]

1570
1571 **F: Okay. So, now we will do an activity together to show what we experience concerning**
1572 **menstrual cramps or other pains that we experience because of our menstrual periods while using**
1573 **contraceptives. So, we will talk about the pains that we experience and menstrual cramps during**
1574 **our menstrual periods while using contraceptives. Do we all understand?**

1575
1576 Yes! [All participants agreed at once]

1577
1578 **F: We will give each of you stickers. If we look at this side, there are stickers where [Name of**
1579 **observer 1] there are stickers that are different colors. Okay, please can you stick on both posters,**
1580 **the front or back anywhere on the body where you have felt menstrual cramps or pain while using**
1581 **contraception during your menstrual periods. As I have mentioned, the stickers have different**
1582 **colors, I will call you according to each sticker. Then you will go and stick on 2 of the posters.**
1583 **Depending on where you would like to put it. Please may I emphasize that you are allowed to stick**
1584 **2 stickers that are the same color, because we are talking about pains. Someone might talk about**
1585 **pains from menstrual cramps and maybe experience a headache, I am making an example. So,**
1586 **she will end up putting 2 stickers, do you see that? You are allowed to do that. So, first please may**
1587 **we have those who use pills or have used them in the past come and get yellow stickers. Are there**
1588 **any of that have used pills or are using pills.**

1589
1590 [Participant raised her hand]

1591
1592 **F: Yes, number 1 is there anyone else? Okay, number 1 please place your sticker or yellow stickers**
1593 **anywhere on the body where you felt pain or menstrual cramps during your menstrual periods.**

1594
1595 [Participant placed the yellow stickers]

1596
1597 **F: Okay, thank you so much, number 1. Okay, I can see that you have placed 2, there maybe other**
1598 **places [on the body]? Is only these 2 only?**

1599
1600 P2: Yes.

1601
1602 **F: Okay. Alright, please come and take green stickers if you use an injection. Or if you have**
1603 **used an injection.**

1605 P3: I have used an injection.
1606
1607 **F: Yes. [Participants stood up and placed the stickers on the posters] Number 2, number 3 and**
1608 **number 7.**
1609
1610 [Slight silence while participants are placing the stickers]
1611
1612 **F: Okay, thank you so much. Please can those who have used implants go and place the stickers,**
1613 **blue. Number 6, number 4 and number 5.**
1614
1615 [Slight silence while participants are placing the stickers]
1616
1617 **F: Okay, has anyone used an IUD? [Slight silence by participants] There is no one between us?**
1618
1619 [Slight silence by participants]
1620
1621 **F: Okay, is there anyone who has used another method that we didn't mention here?**
1622
1623 [Slight silence by participants]
1624
1625 **F: There is no one else?**
1626
1627 [Slight silence by participants]
1628
1629 **F: Okay, now please can we take the sticker, which is a star, it is gold. Please can we place the**
1630 **sticker on the poster on one place on the body where the [menstrual] cramps or pains that you**
1631 **experience during menstrual periods that bothers you the most. So, it is the place on your body**
1632 **where you felt pain the most. Please can we take stars there and place them.**
1633
1634 [Slight silence while participants are placing the stickers]
1635
1636 **F: You are allowed to place your stars on the back and front poster on the same spot [on the**
1637 **body]. You are allowed to do that.**
1638
1639 [Slight silence while participants are placing the stickers]
1640
1641 **F: Okay. So, when we look at this side, lets start with the back. This area, if we were to describe**
1642 **it on our bodies, what would we call it? Where we have placed stickers.**
1643
1644 [Participants raised her hand]
1645
1646 **F: Yes number 3, I have noted you number 7.**
1647
1648 P3: We call it **iqolo** [Meaning: It is a Zulu word that means the lower back].
1649
1650 **F: What do we call it?**
1651
1652 P3: **Umqolo** or **iqolo** [Meaning: It is a Zulu word that means the lower back, both words mean the same
1653 thing].
1654
1655 **F: Okay, number 7.**
1656
1657 P7: I also was going to say it is **iqolo** [Meaning: It is a Zulu word that means the lower back].
1658

1659 **F: *Iqolo*** [Meaning: It is a Zulu word that means the lower back]...Alright...is there anyone else
1660 that has a different explanation?

1661

1662 [Slight silence by participants]

1663

1664 **F: Then here at the front, what do we call this area?**

1665

1666 P3: [Participant mumbling, whispering and inaudible]

1667

1668 [Chuckles by participants]

1669

1670 **F: Pardon number 3. I have noted you, number 1, we will come back to you.**

1671

1672 P3: [Chuckles] It is *phakathi kwamathanga* [Meaning: It is a Zulu word which means in between
1673 thighs].

1674

1675 **F: *Phakathi kwamathanga*** [Meaning: It is a Zulu word which means in between thighs].

1676

1677 P3: Yes.

1678

1679 **F: Okay...**

1680

1681 P1: I was also going to say *phakathi kwamathanga* [Meaning: It is a Zulu word which means in between
1682 thighs].

1683

1684 **F: *Phakathi kwamathanga*** [Meaning: It is a Zulu word which means in between thighs]...Okay,
1685 here?

1686

1687 [Participant raised her hand]

1688

1689 **F: Yes, number 4.**

1690

1691 P4: *Isesinyeni* [Meaning: It is a Zulu word which means it is the bladder].

1692

1693 **F: *Isesinyeni*** [Meaning: It is a Zulu word which means it is the bladder].

1694

1695 P4: Yes.

1696

1697 **F: Okay, number 5 I can also see you, are you agreeing with number 4?**

1698

1699 P5: Yes.

1700

1701 **F: Okay, here?**

1702

1703 P1: *Isekhandu* [Meaning: It is a Zulu word which means it is the head].

1704

1705 **F: *Isekhandu*** [Meaning: It is a Zulu word which means it is the head]. Okay, and then here?

1706

1707 [Participant raised her hand]

1708

1709 **F: Yes, number 4.**

1710

1711 P4: *Amabele* [Meaning: it is a Zulu word which means breasts].

1712

1713 F: **Amabele** [Meaning: it is a Zulu word which means breasts], okay. Alright, so, to those who
1714 placed stickers here, please describe the pain that you experience where you have placed stickers.
1715
1716 [Participant raised her hand]
1717
1718 F: **Yes, number 5. Maybe let's start by describing the pains.**
1719
1720 P5: Here **esinyeni** [Meaning: It is a Zulu word which means by the bladder], in front, it is hot. It is like
1721 I have a stomachache. Here, then my stomach gets bloated and feel uncomfortable. You know when it
1722 is full of air?
1723
1724 F: **Mhm [Yes].**
1725
1726 P5: Yes, but it is also itchy and burning feeling.
1727
1728 F: **Okay and then which word or words you would use to explain that?**
1729
1730 P5: It is bloating of the stomach and the burning feeling on the bladder.
1731
1732 F: **Oh okay. So, it is not [menstrual] cramps, it is the bloating of the stomach and the burning**
1733 **feeling of the bladder?**
1734
1735 P5: It is burning painfully. Yeah, I would say that.
1736
1737
1738 F: **Oh okay. What else do you experience apart from what you have mentioned?**
1739
1740 P6: I, number 6.
1741
1742 F: **Please wait number 6, we will come back to you. Number 5.**
1743
1744 P5: It is like something is cutting you, it is painful like the stomach is cutting. It is like something is
1745 tearing off, I don't know whether to say it is tearing off or cutting.
1746
1747 F: **Mhm [Neutral], yes number 6. I have noted you, number 4.**
1748
1749 P6: I have painful period pains.
1750
1751 F: **Where had you said **esesinyeni**? [Meaning: It is a Zulu word which means by the bladder]**
1752
1753 P6: Yes.
1754
1755 F: **Okay...**
1756
1757 P6: It is like I am getting pulled [in the bladder].
1758
1759 F: **Mhm [Neutral].**
1760
1761 P6: It is like I am getting cut [in the bladder]. It is also like that with me.
1762
1763 F: **Okay. And then which word would you use to describe that pain? What would you call that?**
1764
1765 P6: **Islumo** [Meaning: It is a Zulu word which describes period pains, specifically menstrual cramps].
1766

1767 **F: Oh okay. What is *islumo*?**
1768
1769 P6: Period pains.
1770
1771 **F: Period pains...Thank you...Which experiences have you had that you would like to share**
1772 **concerning period pains? It can be anything that you wish to share.**
1773
1774 P6: No, there isn't for now.
1775
1776 **F: Okay, number 4. Thank you, number 6.**
1777
1778 P4: I would say *imihelo yokusikwa* [Meaning: It is a Zulu word which describes labor pains].
1779
1780 **F: Okay...**
1781
1782 P4: Yes, that is how I would explain it.
1783
1784 **F: The pain that is by the bladder.**
1785
1786 P4: Yes.
1787
1788 **F: What is *imihelo yokusikwa* [Meaning: It is a Zulu word which describes labor pains].**
1789
1790 P4: It is the pain that you feel when you are going to give birth. It becomes painful, it is like you are
1791 being cut here [pointing to the bladder]. *Izinseka*
1792
1793 **F: *Izinseka*...**
1794
1795 P4: Yes, that is what they call it. It is like you are being cut [in the bladder].
1796
1797 **F: Okay, from your own understanding would you call it *imihlelo* or *izinseka* ?**
1798
1799 P4: *Ngemihelo* [Meaning: It is a Zulu word which describes labor pains].
1800
1801 **F: *Ngemihelo* [Meaning: It is a Zulu word which describes labor pains].**
1802
1803 P4: Mhm [Yes].
1804
1805 **F: Oh okay. If you were to describe the pain from here [referring to the bladder]?**
1806
1807 P4: Yes.
1808
1809 **F: Okay, thank you so much, number 4. Okay, so, I can see that here there are stars that we have**
1810 **placed on the back and there are stars at the front. Please tell me why you feel that where you**
1811 **have placed the stars is the place where pain bothers you the most. We said it is where it is most**
1812 **painful. Why do you see it as the place that bothers you the most in terms of being painful? And**
1813 **I would like to know what kind of pain it is where you have placed stars. Let's start on the head.**
1814
1815 [Participant raised her hand]
1816
1817 **F: Yes, number 3.**
1818
1819 P3: Every time in the morning when I wake up, I wake up my head – it is like I could sleep and not
1820 wake up. It is heavy. It is painful.

1821
1822 **F: Mhm [Neutral].**
1823
1824 P3: Yes.
1825
1826 **F: Oh okay. Do you feel the pain during your [menstrual] periods or before you start your**
1827 **[menstrual] periods?**
1828
1829 P3: Once I go on my [menstrual] periods, I have a headache.
1830
1831 **F: Mhm [Neutral], you have a headache.**
1832
1833 P3: Yes.
1834
1835 **F: Oh okay... That is the area [on the body] that you can say is most painful?**
1836
1837 P3: Yes, it is the most painful, every time.
1838
1839 **F: Alright, okay. Is there anyone else that would like to share?**
1840
1841 [Participant raised her hand]
1842
1843 P1: I agree with number 3. It is like you are dizzy. Like you can keep sleeping.
1844
1845 **F: Mhm [Neutral]. Oh, number 1 you also placed a star on the head.**
1846
1847 P1: Mhm [Yes], yes.
1848
1849 **F: Why did you say it is the area that bothers the most on your body?**
1850
1851 P1: It is painful, I have a headache.
1852
1853 **F: Mhm [Neutral], is it the one that makes you sleep?**
1854
1855 P1: Mhm [Yes].
1856
1857 **F: Okay. Alright. So, I can see that here we have placed our stickers in different parts of our**
1858 **bodies. There anyone that maybe would like to explain to here, I can see on the leg, it looks like a**
1859 **leg, here underneath there is a sticker. Maybe is there anyone who would like to share what is**
1860 **happening there?**
1861
1862 [Participant raised her hand]
1863
1864 **F: Number 3 let's start with what is the word for this area on the body?**
1865
1866 P3: I thought it is a foot and not a leg.
1867
1868 **F: Mhm [Neutral].**
1869
1870 P3: Because the foot aches and is painful. You then have **inkwashu** [Meaning: It is a Zulu word which
1871 means paresthesia in the limbs].
1872
1873 **F: Okay, and your foot becomes painful and aches when you are on your [menstrual] periods.**
1874

1875 P3: Yes and have **inkwashu** [Meaning: It is a Zulu word which means paresthesia in the limbs].
1876
1877 **F: Oh okay. Alright, thank you so much. Is there anyone who can say she had less pain when**
1878 **using contraception? That says her pain was less as compared to before she used contraception.**
1879
1880 [Participant raised her hand]
1881
1882 **F: Yes, number 1. I will come back to you number 5.**
1883
1884 P1: I can say that menstrual cramps don't bother me at all.
1885
1886 **F: Mhm [Neutral].**
1887
1888 P1: Yes.
1889
1890 **F: Oh okay. So, even here, you didn't place a sticker for menstrual cramps?**
1891
1892 P1: Yes.
1893
1894 **F: Oh okay, number 5.**
1895
1896 P5: I won't say I don't have it [referring to menstrual cramps] anymore but I do have it [referring to
1897 menstrual cramps] before I start [menstrual periods]. But before I used an implant, I had it [menstrual
1898 cramps] until I finish [menstrual periods] like 2, 3 days before I finish. But now I am on [menstrual]
1899 periods straight and I don't have it [menstrual cramps], I have it before [menstrual periods]. But it is for
1900 just 1 day.
1901
1902 **F: How does it make you feel that there is that change?**
1903
1904 P5: I am happy because before I would have it [menstrual cramps] in such a way that I won't eat, I will
1905 vomit and will always be sleeping. Now I can go and do things.
1906
1907 **F: Oh okay, thank you. Number 1 mentioned that she no longer has pains, and she is very happy**
1908 **about that change. So, thank you so much for sharing your experiences in this activity that we**
1909 **were doing now. We are going to move forward to the following questions. Are we still good?**
1910
1911 Yes! [All participants responded at once]
1912
1913 **F: Oh okay. We can drink water if we would like to drink water.**
1914
1915 [Slight silence, participant drinking water]
1916
1917 **F: Okay, for the next few questions, let us look back; we will remember that we had charts, we**
1918 **spoke about different questions where we looked at bleeding, how much we bleed, we spoke about**
1919 **menstrual cramps, we spoke about how our blood looks and even spoke about that we have blood**
1920 **clots some of us. We spoke about changes that happen in terms of feelings that we have on our**
1921 **bodies. We spoke about how changes impact our daily lives. We then did an activity now where**
1922 **we spoke about pains that we experience during our menstrual cycle because of the contraceptives**
1923 **that we use. We explained that where do we feel pain on our bodies. All that we spoke about**
1924 **because of using contraceptive methods, the changes that we experience. We remember**
1925 **everything that we spoke about.**
1926
1927 Yes! [All participants responded at once]
1928

1929 **F: Okay. Please tell me what information you got from the clinic or healthcare provider about**
1930 **changes to your menstrual cycle before you started using contraception. What information did**
1931 **you get from the clinic or healthcare provider about changes to your menstrual cycle before you**
1932 **started using contraception.**

1933
1934 [Participants raised their hands]

1935
1936 **F: Number 7 and you number 6, you had raised your hand. I have noted you and number 4, I**
1937 **have noted you. Yes, number 7.**

1938
1939 P7: I will start by saying at the clinics, we don't get information as much as we want. Because most of
1940 the time you meet a nurse that doesn't have time. Maybe like me, like how I should be going if I am on
1941 [menstrual] periods, but I don't go. Maybe I must go and get those pills, but you meet a person and find
1942 that even if I have a question that I want to ask about my [menstrual] periods, I end up not getting that
1943 information because she doesn't have time and the way they respond, sometimes they become rude.

1944
1945 **F: Mhm [Neutral].**

1946
1947 P7: So, the information about things that we need, most of the time we don't have them. We don't get
1948 them.

1949
1950 **F: Okay. So, would you say it was helpful or it was not helpful?**

1951
1952 P7: To do what?

1953
1954 **F: The information they gave you.**

1955
1956 P7: I would say it is helpful sometimes because maybe at that time she tells you what she wants to tell
1957 you. And then you will see when you get home how you get out of this situation. But I don't know, but
1958 sometimes it doesn't help that much.

1959
1960 **F: Oh okay...Maybe with regards to what he explained to you, is there something that you**
1961 **experienced and noticed that he had said it will happen?**

1962
1963 P7: No, there isn't. So far there isn't.

1964
1965 **F: Okay, so, you can say maybe it was not helpful. Or it was helpful?**

1966
1967 P7: I haven't noticed but maybe it is still going to happen. But I had not seen change.

1968
1969 **F: Okay, thank you number 7. Thank you for sharing. Number 6.**

1970
1971 P6: Before I inserted the implant the nurse didn't explain to me. She only explained to me that there are
1972 methods for contraception. It is the 3 months injection, the 2 months, it is pills and the implant for 3
1973 years. I jumped for the 3 years [implant] and took 3 years [implant], but I also didn't ask.

1974
1975 **F: What made you take 3 years [implant]?**

1976
1977 P6: It is because I don't like going to the clinic frequently. I just took 3 years [implant] to stay with it
1978 and have it in my body. She didn't explain to me which changes I will face. When I realized that my
1979 goodness – **ngagugula** [Meaning: It is a Zulu slang word for googled] and got information. As I had
1980 mentioned, us who insert the implant go through such things. They were explained in google.

1981
1982 **F: When you say *wagugula* does that mean? What is to *gugula*?**

1983
1984 P6: I made research on the phone.
1985
1986 **F: Mhm [Neutral].**
1987
1988 P6: That if you have inserted [the implant] which things you might discover, the changes that might
1989 happen on your body. Then I discovered that you have a headache, sore breasts, menstrual cramps,
1990 which is exactly what is happening on my body. I found that on the phone.
1991
1992 **F: Okay, so, would you say talking to the healthcare provider didn't help you?**
1993
1994 P6: It didn't.
1995
1996 **F: Okay...**
1997
1998 P6: Yes, it didn't.
1999
2000 **F: Okay, uhm number 4.**
2001
2002 P4: I also didn't get information on how it will treat me.
2003
2004 **F: What did they say?**
2005
2006 P4: They asked me what I want to prevent with.
2007
2008 **F: Mhm [Neutral].**
2009
2010 P4: Then I asked for an implant. Then they inserted it. The information I only got when I saw for a long
2011 time not going on [menstrual] periods. I went to the clinic and asked why I inserted an implant because
2012 I was getting worried, it was a long time. The nurse said, "if you don't go on [menstrual] periods that
2013 shows that what you are using is working. It works for you". That is what she said.
2014
2015 **F: Mhm [Neutral].**
2016
2017 P4: Then I got to be at ease.
2018
2019 **F: The information that you got at that time when you went to ask, was it helpful?**
2020
2021 P4: Yes.
2022
2023 **F: How was it helpful?**
2024
2025 P4: It helped me to be able to not worry a lot.
2026
2027 **F: Mhm [Neutral].**
2028
2029 P4: Mhm [Yes], to not get worried a lot.
2030
2031 **F: Okay, thank you. I have noted you number 2. And number 5 are you raising your hand? Okay**
2032 **and number 5. Please may I ask number 4 and number 6 and number 7, there is something in**
2033 **common that you have, which is that they [healthcare providers] didn't explain anything. Then**
2034 **my question is why you didn't ask and chose to use the contraception that you used.**
2035

F: Yes, number 7.

P7: Unfortunately, I started using my injection for 2 years in the ward after giving birth. I noticed when I was at home that it is [2 years injection] is treating me well, I don't have a problem with it.

F: Mhm [Neutral].

P7: So, it became something that I continue with.

F: When you chose to use it after giving birth, did you see the need to ask what will the side effects be and all of that?

P7: I didn't ask because the nurse said, "here is the injection for preventing, so that you don't get another baby". You see, so, and I continued to use it because it treated me well on my body. I became alright. So, you know when you have just given birth, you are dizzy, to ask a lot of questions is not something on your mind. I noticed the way it was treating and then I continued with it.

F: Okay, thank you, number 7. Number 6.

P6: I didn't ask. The reason for that is because at the clinic you find that it is full. So, I didn't want to take my time. And the nurse that was helping me was not welcoming.

F: Mhm [Neutral].

P6: She just explained to me that there is an injection which is this and this, which one do I choose? Then I chose, she inserted me, she inserted me well I don't want to lie. I didn't have time to ask.

F: Okay. Yes, number 4.

P6: The implant, I was told by my friend that had inserted it. Then I liked how she explained that it is 3 years. So, I won't have time to run to the clinic, compared to other contraceptives, like 2 months [injection], after 2 months you must go and get injected. 3 months [injection]. I liked it [3 months injection] because at least I will insert this thing once, stay for 3 years and take it out after some time. That is what I liked. To ask, I didn't see the need because she [participant's friend] had explained that she is alright. Even though I knew that our bodies are not the same, but I liked what she told me.

F: Oh okay, you went to the clinic//

P6: When I already knew what I was going to get injected with.

F: Okay, alright. Thank you so much, number 4. Please can we go back to number 2. Then we will go to number 5.

P2: I got there, and they explained to me that if you are getting an injection//

F: At the clinic?

P2: At the clinic. If you are going to get an injection, there is the 2 months one and the 3 months [injection]. The 3 months one – okay – you must make sure that if you are going to get an injection, you go on your [set] date. You must delay by a week and then come for an injection because maybe you will get there pregnant. That's why some people say they fell pregnant while on an injection. You must make sure that you go on your [set] date.

2091 **F: Mhm [Neutral].**

2092

2093 P2: And you must make sure that if you were getting an injection, your date was today, stay 7 days
2094 without having sex. Because it might happen that were getting an injection today and then have sex and
2095 it happens that you conceive. The injection must get in you for 7 days.

2096

2097 **F: Mhm [Neutral].**

2098

2099 P2: Yeah, that's how she explained it to me. She mentioned that there is also an implant, you insert the
2100 implant, and it stays in you for 3 years. There is also one [implant] for 5 years. She explained everything,
2101 I went along with the injection.

2102

2103 **F: Okay, would you say that information was helpful.**

2104

2105 P2: It was very helpful because I am going to have a baby that is going to turn 11 [years], I have never
2106 had another baby since I go [to the clinic] on the dates set at the clinic.

2107

2108 **F: Mhm [Neutral].**

2109

2110 P2: And not skip my date [set at the clinic].

2111

2112 **F: Did she explain to you that you will experience side effects that you have noticed and**
2113 **experienced while using contraception?**

2114

2115 P2: Mhm [yes] , she explained to me that the injection makes you wet underneath [Meaning: participant
2116 referring to the vagina when saying "underneath"]. You are always wet underneath, I experienced that.

2117

2118 **F: Mhm [Neutral].**

2119

2120 P2: Yeah.

2121

2122 **F: Mhm [Neutral] Okay. Would you say your nurse was welcoming, interacting and alright?**

2123

2124 P2: She was alright. I got the information, she was alright.

2125

2126 **F: Okay, thank you so much, number 2. Number 5.**

2127

2128 P5: I got the information – maybe it is because I got there carrying a card for 3 months injection and
2129 asked to change to an implant. Then they asked me that I have gone [on menstrual periods] twice or 3
2130 times. I told them that I have a problem I bleed, I come back to the clinic, and they give me pills but it
2131 is the same I bleed. So, she explained to me that there is this and that. She explained everything. That
2132 an implant works like this, and pills like this and that. So, I chose an implant because I had already
2133 heard about it before. Other information – I kept on – because with the implant when I started it troubled
2134 me. Because I kept going back to the clinic, going back to the clinic. She kept trying different ways.
2135 There was a time where she wrote a letter and said I must go to [Name of hospital] at hospital because
2136 there are tests that I need to do, because the problem is my blood and stuff. So, I went but it didn't
2137 happen because there are pills that they gave me and there was a specific way that I had to take them.
2138 Maybe at the clinic they didn't have them or maybe they didn't have information I don't know. But I
2139 ended up being okay.

2140

2141 **F: Is there anything else that you have used apart from the implant?**

2142

2143 P5: I used 3 months [injection] before.

2144

2145 **F: Okay, lets start with the 3 months [injection] that you used. Did you go to the clinic, and they**
2146 **explained to you about it?**
2147
2148 P5: I used 3 months [injection] – no – I went only when I had a problem. But before I got it when I had
2149 given birth.
2150
2151 **F: Oh...**
2152
2153 P5: Because the nurse said here is an injection.
2154
2155 **F: Mhm [Neutral].**
2156
2157 P5: Yes.
2158
2159 **F: So, they didn't explain to you//**
2160
2161 P5: No, they didn't explain to me about it.
2162
2163 **F: Okay, alright. And then the implant, they didn't explain to you about it?**
2164
2165 P5: With the implant they explained to me.
2166
2167 **F: Mhm [Neutral].**
2168
2169 P5: Yes, because they explained to me then I inserted it [implant].
2170
2171 **F: Mhm [Netural].**
2172
2173 P5: Yes.
2174
2175 **F: So, the information that they gave you about the implant, was it helpful?**
2176
2177 P5: Yes, I can say so. Because they told me that I will get hungry. It makes you hungry. If I won't be
2178 able to control the way I eat, I will end up gaining weight. They said I might bleed but it is for while
2179 then it stops. If it doesn't stop, I can come back [to the clinic]. I might have something on my face, a
2180 rash or something. They explained a lot of things.
2181
2182 **F: Mhm [Neutral], okay...**
2183
2184 P5: Yes.
2185
2186 **F: Did you experience all the things [side effects] that they explained to you.**
2187
2188 P5: Yes...
2189
2190 **F: Mhm [Neutral].**
2191
2192 P5: Some of it, but not all of it.
2193
2194 **F: Not all of it.**
2195
2196 P5: Yes.
2197

2198 **F: But when you experience them [side effects], from your perspective did the information help**
2199 **you to deal with them [side effects] since you were already informed about it?**

2200
2201 P5: Yes.

2202
2203 **F: Okay, thank you so much. Thank you for sharing. Now, think of all the things we have talked**
2204 **about today. What do you wish they had told you more about the changes to your menstrual cycle**
2205 **before you started using a contraception?**

2206
2207 [Participant raised her hand]

2208
2209 **F: Number 1.**

2210
2211 P1: Please repeat the question.

2212
2213 **F: If you think of all the things we have talked about today. What do you wish they had told you**
2214 **more about the changes to your menstrual cycle before you started using a contraception?**

2215
2216 P1: It is that how will they [contraception pills] treat me.

2217
2218 **F: Mhm [Neutral].**

2219
2220 P1: Okay, because I took pills, they were supposed to say they are taken at the same time and so forth.

2221
2222 **F: Mhm [Neutral].**

2223
2224 P1: I didn't get information at the clinic. I only got it at home.

2225
2226 **F: Oh okay.**

2227
2228 P1: And the changes on the body.

2229
2230 **F: Mhm [Neutral]**

2231
2232 P1: Yes.

2233
2234 **F: Which information would you say would have made your experience of using this**
2235 **contraception better if they had informed you about it.**

2236
2237 [Slight silence by participant]

2238
2239 **F: What would have made it better to use the contraception, if they had told you the information?**

2240
2241 P1: There is nothing.

2242
2243 **F: There is nothing. Okay...Thank you, number 1. Number 6.**

2244
2245 P6: I wish they would have told me that I mustn't eat a lot because I will gain weight. Yeah. [Chuckles
2246 by participant] And that I will have period pains for a long time.

2247
2248 **F: Mhm [Neutral].**

2249
2250 P6: Yeah...Because those are the things that I don't like.

2251

2252 **F: Okay. What information would have made your experience with contraceptives better?**
2253
2254 P6: It is for them to give me information.
2255
2256 **F: Which information would have preferred that they told you when you experienced the side**
2257 **effects, and thought to yourself it would have been better if//**
2258
2259 P6: //It would have been better if they had told me that I must not eat a lot.
2260
2261 **F: Mhm [Neutral].**
2262
2263 P6: Yes, because I will gain weight.
2264
2265 **F: Alright, okay. Thank you. What is the most important information you would want a friend to**
2266 **know about these changes before starting to use contraception?**
2267
2268 [Participant raised her hand]
2269
2270 **F: Number 2.**
2271
2272 P2: If you are using an injection, when you are starting you will not go on [menstrual] periods. But you
2273 will eventually go on them [menstrual periods] as time goes by you will go [on menstrual periods].
2274
2275 **F: Mhm [Neutral]. Okay, is there anyone else that would like to share? [Slight silence by**
2276 **participants] Okay, we are about to finish our discussion. I would like for all of us to stand up.**
2277
2278 [Movements of participants standing up]
2279
2280 **F: For this last activity, we will talk about two questions healthcare providers or researchers**
2281 **sometimes ask people [women or girls] about their menstrual cycle. I will ask you each question,**
2282 **and we will take a few minutes. Are we all still good?**
2283
2284 Yes. [All participants responded at once, they sounded exhausted]
2285
2286 **F: When you last had a period, would you describe it as: light, moderate, or heavy? Okay, please**
2287 **raise your hand if you would say it, was light. Your blood flow was light. It was light, anyone who**
2288 **said says it was light.**
2289
2290 [No response from participants, indicating that there were no light menstrual periods].
2291
2292 **F: Okay, please raise your hand if you say it was heavy. Number 6, number 4, number 3, number**
2293 **1, number 7. Here we are talking about your last period, right.**
2294
2295 Mhm. [Yes] [All participants responded at once]
2296
2297 **F: All of you that say it was heavy, please go that side.**
2298
2299 [Participants stood up and went to the side of the room allocated to them]
2300
2301 **F: Those of you who say it was moderate, please raise your hand. Please stand this side. Let's start**
2302 **this side, number 2 and number 5 that said it was moderate. How did you decide on your answer?**
2303
2304 P2: How did I decide?
2305

2306 **F: Mhm [Yes], how did you decide that your last period was moderate?**
2307
2308 [Participant 2 still thinking, participant 5 raised her hand]
2309
2310 **F: Yes, number 5.**
2311
2312 P5: I could tell from the pads that I was using; I know how many I use in day or how many pads I use
2313 until I finish [menstrual periods].
2314
2315 **F: Mhm [Neutral].**
2316
2317 P5: I usually use 3 packets in five days. This time around I used 2 [packets], on the 3rd packet I took out
2318 2 [pads] only.
2319
2320 **F: Okay, thank you number 5. Let's come this side. How did you decide on your answer. Anyone**
2321 **can respond.**
2322
2323 [Participant raised her hand]
2324
2325 **F: Yes, number 7.**
2326
2327 P7: I decided based on that [menstrual] periods is not something that I go on frequently. So, by the time
2328 they come, they come very heavy.
2329
2330 **F: They [menstrual periods] come very heavy... Okay, is there a difference between the quantity**
2331 **if pads that you use?**
2332
2333 P7: Yes, there is.
2334
2335 **F: What is the difference?**
2336
2337 P7: The difference is that I see with how many I use, at that time when I have them.
2338
2339 **F: Oh, you use a lot?**
2340
2341 P7: Yes.
2342
2343 **F: Alright, okay. Thank you so much. Okay, when you responded to the question that I asked you**
2344 **at the beginning, that when you last had your period, would you describe it as: light, moderate or**
2345 **heavy? Okay, when did your [menstrual] periods take place? Was it last month or 2 months,**
2346 **please raise your hand if it was last month or 2 months ago?**
2347
2348 [Participant raised her hand]]
2349
2350 **F: Yes, number 2.**
2351
2352 P2: Last month.
2353
2354 **F: Last month.**
2355
2356 P2: Yes.
2357
2358 **F: Okay, those who say it was 3 to 6 months ago.**
2359

2360 [No response from participants, indicating that no one had menstrual periods between 3 to 6 months
2361 ago].

2362

2363 **F: Those who say more than 6 months ago.**

2364

2365 [No response from participants, indicating that no one had menstrual periods more than 6 months ago].

2366

2367 **F: Okay, those who didn't raise their hands, when last did they have their [menstrual] periods?**
2368 **Their last period.**

2369

2370 [Participant raised her hand]

2371

2372 **F: Yes, number 4. I will come to you, number 5.**

2373

2374 P4: Mine was last week.

2375

2376 **F: Oh, last week...**

2377

2378 P4: Yes.

2379

2380 **F: Okay. Yes, number 5.**

2381

2382 P5: The last one was this month on the 2nd.

2383

2384 [Participant raised her hand]

2385

2386 **F: Okay. Yes, number 6.**

2387

2388 P6: The last was one was yesterday.

2389

2390 [Participant raised her hand]

2391

2392 **F: Okay, yes number 1.**

2393

2394 P1: The last one was at the beginning of the month.

2395

2396 **F: Okay. Alright, thank you. Was there anything about this first question that made it difficult to**
2397 **answer?**

2398

2399 P1: No.

2400

2401 **F: No?**

2402

2403 P1: Mhm [Yes].

2404

2405 **F: Okay. Thank you. We will move on to the 2nd question. On the heaviest day of your last period,**
2406 **how many menstrual pads, tampons, or other materials did you need to use for [menstrual]**
2407 **periods?**

2408

2409 [Participant raised her hand]

2410

2411 **F: Yes, number 6.**

2412

2413 P6: I usually use baby pampers. The ones that are 10 inside [a pack]. I usually buy them.

2414
2415 **F: Mhm [Neutral].**
2416
2417 P6: Yes, and it can be more than 10.
2418
2419 **F: Okay, thank you so much. Please can we raise our hands if there anyone who used 1.**
2420
2421 [No participant raised her hand]
2422
2423 **F: Is there anyone who used 2 or 3 or 4? Okay number 4, number 5, have you also raised your**
2424 **hand?**
2425
2426 P5: Please may I ask.
2427
2428 **F: Yes.**
2429
2430 P5: If you say anyone who used 1, like 1 pack or packets until you finish. I don't understand.
2431
2432 **F: You can explain in your own way. If you say you used 1 pad or 1 packet [of sanitary pads], but**
2433 **it must be//**
2434
2435 P5: Oh okay...
2436
2437 **F: Yes, so, how many say they used 1.**
2438
2439 [No participant raised her hand]
2440
2441 **F: How many say they used 2, 3, or 4.**
2442
2443 [Participants raised their hands]
2444
2445 **F: Okay, so, number 7, number... Please can you raise your hands so that I can see you. Number**
2446 **7, number 4, number 3, number 1, number 5, number 2 and number 6. So, all of you are between**
2447 **2 -4?**
2448
2449 Yes [All participants agreed at once]
2450
2451 **F: Okay, this was on your last period.**
2452
2453 Yes [All participants agreed at once]
2454
2455 **F: Okay. So, let's start with the heavy group. All of you said you are between 2-4 if I am not**
2456 **mistaken. Maybe let's take number 1 and number 3, please can you explain how many you used?**
2457
2458 P1: I used 2 packets until I finished.
2459
2460 **F: You used 2 packets, until you finished. Okay, number 3.**
2461
2462 P3: I used 3 packets until I finished.
2463
2464 **F: Okay and you, number 4.**
2465
2466 P4: I usually use 1 packet and the other one but not finish the 2nd one. But this time I used both packets
2467 and they finished and added the 3rd one but it didn't finish.

2468
2469 **F: Okay, what were you using?**
2470
2471 P4: Pads.
2472
2473 **F: And the others were using pads, number 1 and number//**
2474
2475 P3: //Number 3, yes.
2476
2477 P1: Yes, pads.
2478
2479 **F: Okay, number 6.**
2480
2481 P6: I usually use baby pampers. So, in a packet there are 10 inside. The small ones. I usually use 2
2482 packets of those. But maybe 2 or 1 will be left. Then I use towards the end of my [menstrual] periods,
2483 I use pads.
2484
2485 **F: Mhm. [Neutral]**
2486
2487 P6: Yes, pads or tampons.
2488
2489 **F: So, on your last period, how many did you use?**
2490
2491 P6: Let's say mmh 15, 16.
2492
2493 **F: Okay...**
2494
2495 P6: Yes, then I used pads, let's say maybe 5.
2496
2497 **F: What was 15?**
2498
2499 P6: It is the baby pampers.
2500
2501 **F: Oh okay. And it was pads//**
2502
2503 P6: //And then it was pads, maybe 5.
2504
2505 **F: Okay. Which means that with the question I asked previously, it was more then 2 or 4. You**
2506 **used more than 15//**
2507
2508 P6: // I was explaining the packets//
2509
2510 **F: //Oh, it is the packets...**
2511
2512 P6: Yes, yes.
2513
2514 **F: Okay, I understand. Number 7.**
2515
2516 P7: I use 2 packets. If it is the long ones. But night ones, the long ones. And then if it is the small ones,
2517 it is maybe 3 or 3 and a half because I must change every time as a heavy bleeder.
2518
2519 **F: Okay, lets come to the moderate. Number 5 and number 2. How many did you use number 2?**
2520
2521 P2: 1 packet.

2522
2523 **F: Okay, what were you using?**
2524
2525 P2: *Always* [always is a sanitary pad brand], pads.
2526
2527 **F: Okay.**
2528
2529 P5: I used 2, then in the 3rd pack. I took out 2 pads. Yes.
2530
2531 **F: So, we can see in 2 of the groups there is a difference with the numbers. Let's come back to the**
2532 **group that is heavy. There are differences with our numbers. Some use 2, 3, 2 15, 5, 2...What do**
2533 **you think caused the difference with your numbers. Yet you are in 1 group of people who are**
2534 **heaviest?**
2535
2536 [Participant raised her hand]
2537
2538 **F: Yes, number 1.**
2539
2540 P1: Maybe we don't use the same pads.
2541
2542 **F: Oh, it is the type of pads that you use.**
2543
2544 P1: Mhm [Yes].
2545
2546 **F: Okay, maybe can you explain in depth that when you say they are not the same, in what way?**
2547
2548 P1: Some use the small ones [in size], the ones that make you change frequently. Some use the long
2549 ones; you can stay with them [sanitary pads] a little bit.
2550
2551 **F: Oh okay, thank you number 1. Is there anyone else that would like to share.**
2552
2553 [Participant raised her hand]
2554
2555 **F: Number 4.**
2556
2557 P4: Maybe I can say that compared to before, as I mentioned before I used 1 packet, and I didn't finish
2558 the 2nd one. This time around I used 2 complete packets and then used some of the 3rd one. That's why
2559 I am considering it as being heavy this time around.
2560
2561 **F: Mhm [Neutral].**
2562
2563 P4: Yes.
2564
2565 **F: Okay. Why do you think there is a difference with your numbers, amongst you from your**
2566 **perspective? What caused the difference?**
2567
2568 P4: Maybe it is the things we use for preventing [referring to contraception].
2569
2570 **F: Okay, oh okay. How does it affect you?**
2571
2572 P4: Going on [menstrual] periods?
2573
2574 **F: Mhm [Neutral].**
2575

2576 P4: It affects us with the changes in the [menstrual] periods, how long you go on them.
2577
2578 **F: Oh okay, because of the things that you use for contraception, the number of days you go on**
2579 **your [menstrual] periods change.**
2580
2581 P4: Yes.
2582
2583 **F: Would you say that?**
2584
2585 P4: Yes.
2586
2587 **F: Oh okay, thank you number 4.**
2588
2589 **[Participant raised her hand]**
2590
2591 **F: Yes, number 6.**
2592
2593 P6: I was going to say what has been said by number 4.
2594
2595 **F: Mhm [Neutral].**
2596
2597 P6: So, I agree with her.
2598
2599 **F: Okay. Thank you. Let's come to the moderate, I can see there is a difference. One said she**
2600 **uses 1 and one said she uses 2. Why do you think there is a difference, yet you are in one group?**
2601
2602 **[Participant raised her hand]**
2603
2604 P2: It is the ways of contraception; I use an injection, and she uses an implant. It could be that.
2605
2606 **F: Okay, thank you so much. Was there anything difficult about the 2nd question that made it**
2607 **difficult to answer?**
2608
2609 No. [All participants responded at once]
2610
2611 **F: Okay, how do you think another person would have responded to this question if using another**
2612 **material apart from [sanitary] pads or tampons? Apart from pads, since you are using pads. How**
2613 **would another person have answered who doesn't use [sanitary] pads. Maybe a person who uses**
2614 **tampons or uses something else.**
2615
2616 P5: I think she would have said there was a difference because maybe what she is using is stronger than
2617 pads.
2618
2619 **F: What if she was using maybe a toilet paper or using a cloth. How do you think she would have**
2620 **felt, how would she have answered this question?**
2621
2622 P3: She would have responded well because we are all girls. I don't think I would be scared to say I
2623 insert a cloth if I insert a cloth if I am bleeding a lot. Because if you are bleeding a lot, it happens that
2624 you take the cloth and use the cloth because it absorbs bleeding heavily.
2625
2626 **F: Okay. Number 3, how do you think another person would have answered this question if they**
2627 **often do not have enough pads, tampons or anything?**
2628

2629 P3: She would have responded...Because we are not the same. We come from different homes. Maybe
2630 I don't have money to buy [sanitary] pads. I can use a cloth, and I can use a toilet paper, the hard one,
2631 not the soft one.

2632

2633 **F: Okay. Thank you, number 3. Yes number, 7.**

2634

2635 P7: I would say she would have answered [the question] but she wouldn't have answered it well like
2636 we are able to count how many packets of pads we used. She won't be able to count that with the tissue.
2637 Because every time when you go to urine you know that you must change it [sanitary pad]. We know
2638 that okay, I am using 2 going on my 3rd one. So, her response won't be the same as ours using cloths
2639 and tissues.

2640

2641 **F: Okay, thank you, number 7. Sometimes people have very small amount of bleeding, and they**
2642 **may need to use any menstrual pad, tampon, 'panty liner', or other materials. What words would**
2643 **you use to describe to describe this very small amount of bleeding?**

2644

2645 **[Participant raised her hand]**

2646

2647 **F: Yes number 5.**

2648

2649 P5: Maybe we can say you have drops. Like I don't know.

2650

2651 **F: Okay, they are drops, alright. [slight silence by participants] What does the word spotting**
2652 **mean?**

2653

2654 P7: It is what you are saying.

2655

2656 **F: Mmh [Pardon]. Yes, number 7.**

2657

2658 P7: [Chuckles] We had forgotten it, we now remember since you are saying it.

2659

2660 **[Chuckles by participants]**

2661

2662 **F: What does the word spotting mean?**

2663

2664 P7: It is to bleed a little bit; it is just drops.

2665

2666 **F: Oh okay. How do you know if you have that kind of bleeding?**

2667

2668 P7: You know because it always happens when you are on your [menstrual] periods.

2669

2670 **F: Oh, is it when you about to go on your [menstrual] periods or when you have started? Is it**
2671 **something that happens when you are on your [menstrual] periods?**

2672

2673 P7: It is something that happens when you are about to complete your periods.

2674

2675 **F: Oh okay...**

2676

2677 P7: It also happens that another might go on [menstrual] periods and when they are about to finish, they
2678 spot to show that they are about to finish.

2679

2680 **F: Okay and how do you choose whether you use a pad or tampons or anything else if you have**
2681 **this kind of bleeding?**

2682

2683 P7: It depends on how much you bleed. If you know that you don't bleed a lot, you are a light bleeder,
2684 you can use a pantyliner when spotting. So, since we know we are heavy bleeders, we are always afraid
2685 that anytime I will use a pantyliner, yet it is getting messy.

2686

2687 **F: Oh okay. Thank you. We have reached our last question. When you have this very small**
2688 **amount of bleeding, how would you answer the 2nd question? The second question is on your last**
2689 **period, how many materials did you use on the day you were bleeding the heaviest. So, if you have**
2690 **this very small amount of bleeding that we are talking about, how would you answer this**
2691 **question?**

2692

2693 [Slight silence by participants. Participants are tired and not showing interest]

2694

2695 **F: Okay... Should I ask again?**

2696

2697 Mhm [Yes]. [All participants responded at once]

2698

2699 **F: If you have this very small amount of bleeding, spotting. How would you respond to this**
2700 **question, on your last period, how many materials did you use on the day you were bleeding the**
2701 **heaviest?**

2702

2703 [Slight silence]

2704

2705 [Participant raised her hand]

2706

2707 **F: Yes, number 4.**

2708

2709 P4: Let's say you are spotting; you would use 2 [sanitary pads].

2710

2711 **F: 2.**

2712

2713 P4: Yes. If you are spotting.

2714

2715 **F: Okay, number 6.**

2716

2717 P6: Maybe if she is a person who uses pantyliners, maybe she would say she used pads. Yeah.

2718

2719 **F: Okay. Thank you so much, we can come back and sit down. Thank you so much for answers.**
2720 **Before we conclude our discussion, is another thing that you think we need to know that you wish**
2721 **to add. Are we all alright?**

2722

2723 Yes, we are alright [All participants responded at once].

2724

2725 **F: Thank you for sharing. Thank you for being patient with me and for being part of our**
2726 **discussion today. The date for today is 23 January 2025. Time is 13:25, focus group C103.**
